Dear Synopsys:

Congratulations on 20 years of successful business and community involvement! Through the ups and downs of the electronics industry, Synopsys has remained steadfast in improving the communities where its employees live and work.

In Silicon Valley, the work of the Synopsys Outreach Foundation has helped to inspire the next-generation of technology leaders by fostering local education and science programs. Synopsys' philanthropy targets creative science programming in the schools. Together, these programs focus on developing a future workforce of skilled engineers for Silicon Valley and beyond.

For more than 50 years, Community Foundation Silicon Valley has been helping improve the quality of life for people in Silicon Valley. Our vision is to create a region whose residents lead the nation in their generosity, civic engagement, inclusiveness, and collaboration to address community needs. We are proud to be a partner with Synopsys, a true leader in corporate philanthropy and community involvement.

Happy 20th Anniversary and best wishes for continued success.

Sincerely,

Peter Hero

President

Community Foundation Silicon Valley
