

Chris Clark

Senior Manager, Automotive Group

Chris Clark, a Senior Manager in the Synopsys Automotive Group, is a 23-year veteran of the IT world who uses his experience in automotive systems, embedded device testing, and cybersecurity practices to help automotive organizations effectively integrate meaningful security solutions into their environments. Chris holds a master's degree in cybersecurity from the University of Maryland University College and has also earned numerous certifications throughout his career.

He has worn many hats, including roles as project manager, product manager, data center operations manager, director of information systems, hospital system CIO, and security evangelist. Chris also participates with standards bodies to ensure effective security requirements are included in the development of future standards. Chris is currently focused on helping customers in the automotive field minimize their cybersecurity risks by engaging and sharing his knowledge and experiences in the hopes of building a more cyber resilient future.
