

## Christopher Tice

Vice President, Hardware Marketing and Manufacturing

Christopher Tice is vice president of Hardware Marketing and Manufacturing in the Verification Group, responsible for driving the growth of Synopsys' verification business based on a foundation of systems tools and solutions addressing fast-growing verticals such as automotive, AI, networking, and 5G. He is also responsible for Synopsys Hardware Manufacturing

Before joining Synopsys, he was an entrepreneur-in-residence at SK Telecom Innopartners. Mr. Tice spent 16 years at Cadence Design Systems, where he was senior vice president and general manager of the Hardware and Systems Groups. Prior roles included vice president of Quickturn Design Systems and general manager of Weitek's Processor Business Group.

Mr. Tice received his BSEE with honors from the University of Florida and attended the MBA School at Florida Atlantic University. He was elected as an inaugural member of the Electrical and Computer Engineering Academy of the University of Florida in 2009.
