

Dr. Johannes Stahl

Sr. Director, Product Marketing, Emulation and Verification Continuum Solutions

Dr. Johannes Stahl is responsible for emulation and Verification Continuum solutions marketing. He has more than 25 years of industry experience including technical and business responsibilities for tools and services for SoC design and software development. During his earlier tenure at Synopsys, Dr. Stahl was responsible for FPGA-based prototyping and virtual prototyping products. Earlier he led the Synopsys engineering services team that delivered custom IP cores for wireless and broadcasting applications to major semiconductor companies. During that time he also pioneered and successfully executed methodologies for first-time silicon success. Before Synopsys, Dr. Stahl had marketing responsibility in the executive team at CoWare, where he was managing major product lines as well as all IP partner relationships.

Dr. Stahl holds Dipl.-Ing. and Dr.-Ing. degrees in Electrical Engineering from Aachen Technical University, Germany.
