

Swami Venkat

Sr. Director of Strategic Programs, Silicon Realization Group

As Sr. Director of Strategic Programs in the Silicon Realization Group, Swami Venkat is responsible for managing interactions with strategic customers. Prior to his current role, Swami was responsible for marketing of the Galaxy Design Platform and for product marketing of functional verification tools in the Synopsys Verification Group. He joined Synopsys in 1998 and has 20 years of experience in the VLSI design and EDA industries. Before joining Synopsys, Swami worked as a hardware engineering manager at Sun Microsystems, managing the chip, board, and system-level verification of Sun's Solaris server product lines. Prior to Sun, he worked as a circuit designer and verification engineer for the MIPS microprocessor family at SGI, Inc. Swami has a B.S.E.E. from Mangalore University, India, and an M.S. in Engineering Management from Stanford University.
