

Tom De Schutter

VP of Engineering, Systems Design Group

Tom De Schutter is VP of Engineering for the Systems Design Group at Synopsys. He is responsible for the company's FPGA prototyping (HAPS®) and virtual prototyping (Virtualizer™, Platform Architect™, Saber™, Silver, TestWeaver®) products. Tom joined Synopsys through the acquisition of CoWare, where he was the product marketing manager for transaction-level models. He has 20 years of experience in prototyping through different marketing and engineering roles. Tom holds an MSEE degree from KU Leuven in Belgium. He was the editor of "Better Software. Faster! Best Practices in Virtual Prototyping."
