**Forward-Looking Statements**

This presentation contains forward-looking statements including, but not limited to, statements regarding Synopsys’ short-term and long-term financial targets, expectations and objectives; business outlook, opportunities and strategies; customer demand and market expansion; strategies related to our products and technology; our planned product releases and capabilities; industry growth rates; software trends; planned acquisitions and buybacks; our expected tax rate; the expected impact of U.S. and foreign government action on our results; and the expected impact of the COVID-19 pandemic. These statements involve risks, uncertainties and other factors that could cause our actual results, time frames or achievements to differ materially from those expressed or implied in our forward-looking statements. Such risks, uncertainties and factors include, but are not limited to: risks from the effect of the COVID-19 pandemic and the associated economic downturn on our business, operations and financial condition; uncertainty in the growth of the semiconductor and electronics industries; consolidation among our customers and our dependence on a relatively small number of large customers; risks and compliance obligations relating to the global nature of our operations as well as actions by the U.S. or foreign governments, such as measures in response to the COVID-19 pandemic or the imposition of additional tariffs or export restrictions; macroeconomic conditions and uncertainty in the global economy; fluctuation of our operating results; increased variability in our revenue due to the adoption of ASC 606, including the resulting increase in recognizing upfront revenue as a percentage of total revenue; and more. Additional information on potential risks, uncertainties and other factors that could affect Synopsys’ results is included in filings it makes with the Securities and Exchange Commission from time to time, including in the sections entitled “Risk Factors” in its Annual Report on Form 10-K for the fiscal year ended October 31, 2020, and in its latest Quarterly Report on Form 10-Q. The information provided herein is as of May 19, 2021. Synopsys undertakes no duty, and does not intend, to update any forward-looking statement, whether as a result of new information, future events or otherwise, unless required by law.

**Regulation G**

In addition to financial results prepared in accordance with Generally Accepted Accounting Principles, or GAAP, this presentation will also contain certain non-GAAP financial measures. Except for certain forward-looking non-GAAP financial measures for which a reconciliation is not possible without unreasonable efforts, reconciliations of the non-GAAP financial measures contained in this presentation or given verbally to their most comparable GAAP measures are included in the table at the end of this presentation, along with the second quarter of fiscal year 2021 earnings release and financial supplement, dated May 19, 2021, and available on Synopsys’ website at https://www.synopsys.com/company/investor-relations/financial-news.html.
## Synopsys: The Market & Technology Leader

### Broad Product Portfolio
- Electronic Design Automation (EDA)
- Semiconductor Intellectual Property (IP)
- Software Security and Quality

\(^{(1)}\) These targets were provided by Synopsys as of May 19, 2021, and are not being updated at this time; a GAAP to non-GAAP reconciliation of FY21 Operating Margin targets and FY21 EPS targets are included at the end of this presentation.
Synopsys: The Market & Technology Leader

Electronic Design Automation
~35 years of investment and execution
~65% of revenue
Market Leader

Semiconductor IP
>20 years
~25% of revenue
#2 IP Vendor

Software Integrity
~7 years
~10% of revenue
Emerging Leader, Broaderest Portfolio
Long-Term Financial Objectives

• While the results in any given period may vary due to acquisitions or other near-term priorities, our primary long-term objective is to drive double-digit non-GAAP EPS growth on a multi-year basis, through a mix of the following elements:

• Grow total revenue generally in the high single-digit range:

  EDA revenue generally in the mid-to-high single-digits
  IP & System Integration revenue generally in the low double-digits
  Software Integrity revenue exceeding market growth, generally in the 15-20% range long-term as market evolves

• Drive non-GAAP operating margin into the high-twenties by 2021 and greater than 30% longer-term

• Utilize our strong cash flow primarily for M&A and share buybacks

1. These multi-year objectives are provided as of May 19, 2021.
2. Period to period fluctuations are a normal element of our business, driven particularly by timing of hardware and IP deliveries. Variability, which increased as a result of ASC 606 adoption, should be expected.
Synopsys: The Market and Technology Leader

Uniquely Positioned for Stability and Growth

► Robust End Markets Driving Growth

• Clear Technology Leadership

• Financial Strength and Growth
Global Value Chain – 2020

EDA & IP – At the Heart of Accelerating Electronics Innovation

EDA & IP  
$12.2B

Embedded Software  
$11.6B

Foundry  
$85.4B

Semiconductors  
$492.7B

Electronic Systems  
$1.65T

Blue Chip, Diversified Customer Base

**Semiconductors**
- Semi R&D (including EDA) is a top investment priority for semi and system customers in all phases of business cycle
- Consists of virtually all semiconductor companies in the world, including all of the top 20
- One >10% customer in FY20

**Systems**
- ~40% of our revenue comes from systems companies
- Systems companies develop chips as an input to an end product, rather than selling the chip itself
- Verification challenges are rapidly growing at the intersection of hardware and software

**Software Developers**
- Key function across all industries: semis and systems, to enterprises in segments such as financial services, medical devices, automotive, and industrial
- Targeting the 20M+ SW developers
- Immense software complexity challenges plus high impact of security vulnerabilities
New Technology is Impacting Every Vertical
Artificial Intelligence Market Growth

Deep Learning Chipset Market to Reach $72B by 2025

Enabling and Leveraging the Potential of AI

Synopsys tools incorporate AI/ML technologies while enabling AI processor development

Design and Verification Tools for AI Processors

- Multiple years of collaboration alongside AI pioneers – deep understanding of AI design implications and challenges
- Verification solutions from architecture to simulation to emulation and prototyping
- Fusion Design Platform™ significantly enhanced to address AI processor design challenges
Leading AI-based Chip Design Technologies

- DSO.ai (Mar. 2020): The world’s first autonomous AI app for design, delivers a leap in designer productivity
- “ML Everywhere” enables continuous improvement for better PPA and faster TTR
- “Synopsys’s PrimeTime with new machine-learning technology allows us to complete ECO runs in hours versus the days it took before, and reuse learnings across blocks, hierarchies, and even design styles.”
  - Renesas
Enabling and Leveraging the Potential of AI

Synopsys tools incorporate AI/ML technologies while enabling AI processor development

**IP Solutions Designed for AI Applications**

- Proven IP solutions accelerate time-to-market
- Memory/interface/analog IP designed to handle the uniquely intensive AI demands of memory capacity, bandwidth and coherency
- ABI Research forecasts AI chipset sales to exceed $10B in 2024 with SoCs across all markets containing AI capabilities
Automotive – A Case Study

Synopsys: The Market and Technology Leader

Uniquely Positioned for Stability and Growth

- Robust End Markets Driving Growth
- Clear Technology Leadership
- Financial Strength and Growth
Synopsys: Silicon to Software

- **Software**
  - Application security & quality testing
  - Leader in Gartner’s Magic Quadrant

- **Verification**
  - Fastest engines & unified platform
  - HW/SW verification & early SW bring-up

- **IP**
  - Broadest portfolio of silicon-proven IP
  - #1 interface, embedded mem. & physical IP

- **Design**
  - Digital & custom AMS platforms
  - Long-standing market leader
  - Best quality of results & highest productivity

- **Silicon**
  - TCAD, lithography tools & yield optimization
  - Down to 5nm & below
LEADER IN EDA

- Market and technology leader in EDA, the tools and technologies used to design semiconductor chips and systems
  ~$7.6 billion market*; generally tracks semiconductor R&D spend over time
- Growth drivers: all aspects of chip & system complexity
- All leading semiconductor companies in the world use Synopsys technology
- State-of-the-art design and verification platforms with unmatched global support

#1 in Digital Design: Synopsys Fusion Design Platform™

**FUSION DESIGN PLATFORM**

- **RTL Architect**
  - Test Fusion
  - Design Compiler NXT
  - IC Compiler II
- **Formality / ECO PrimeECO**
  - PrimeTime
  - PrimePower
  - PrimeShield
  - StarRC
  - IC Validator
  - RH Fusion

**Fusion Architecture**
- #1 Anchors: Synthesis, P&R, Signoff
- Fusion of algorithms, engines, data model

**Innovative Products**
- Industry Unique Fusion Compiler
- DC NXT, TestMAX, IC Validator NXT

**Market Leadership**
- AI-enhanced tools, AI-driven apps
- Cloud-ready
Synopsys Fusion Compiler™

- Only single product on market with innovative next-generation integration of synthesis, place & route and key signoff technologies
- Built with market-leading products
- Redefines conventional product boundaries; sharing of algorithms, code and data model
- New synthesis engine, developed from ground up for significantly higher capacity & performance
- Strong momentum with considerable benchmark wins and competitive displacements, driving accelerating digital design revenue growth
Custom Design Platform

- **Custom Compiler**
- **PrimeSim**
- **NanoTime**
- **PrimeLib**
- **StarRC**
- **IC Validator**

**Innovative Products**
- Industry anchors HSPICE, CustomSim, FineSim
- Custom Compiler Next-generation custom layout

**Competitive Differentiation**
- Flexible, open environment
- Faster custom design closure

**Market Momentum**
- PrimeSim launched in March 2021
- Multiple full flow competitive displacements
Synopsys Custom Compiler™ Adoption Growing
Verification Continuum® Platform

Best-in-Class Verification
- Complete platform with #1 products in all categories, hardware-based and software-based

Fastest Engines
- Highest-performance engines speed time-to-market

Accelerating Innovation
- Investing in domain-specific, AI and cloud technology to improve verification efficiency
Verification Hardware: ZeBu® Server 4 Emulation System

Leading System for Software Bring-up
Only modern system to allow software-on-hardware validation

Industry’s Fastest Emulation System
2X higher performance

Industry’s Largest Capacity
Scalable to 19B+ gates

Industry’s Lowest Total Cost of Ownership
1/10th lower power consumption, half data center footprint
Leader in Semi IP

• #2 market share in IP, the reusable building blocks that are used for chip designs
  – Leading supplier of interface, memory, analog and physical IP
  – ~$4.6 billion market*, benefitting from our customers’ move to outsourcing more and more complex IP

• IP reuse reduces our customers’ chip design costs, lowers risk and speeds time-to-market

• Serving high-impact, growing markets (IoT, Automotive, Security, Cloud Computing) & latest processes and protocols

• ~20 years of investment and commitment resulting in unmatched portfolio breadth, quality and reliability

* Source: Ipnest (Apr 2021); Internal estimates (Apr 2021)
Broadest and Most Comprehensive IP Platform

- Broadest portfolio available in the market; FY20 revenue >$900M
- Covers vast majority of chip
- Growing demand for more integrated subsystems
- New markets drive new opportunities
- Customers count on us for the long haul to accelerating time-to-market and reduce risk

* Small boxes are standard cell library elements.
High-Impact Markets: Increasing Technology Complexity
Driving Growth in Third-Party IP Demand

AI
Machine Learning, Deep Neural Networks

AUTOMOTIVE
ADAS, Infotainment, Connected Vehicle

CLOUD
Networking, Servers AI Accelerators

IoT
Smart Home, Industrial, Wearables
Comprehensive IP Solutions for Cloud Computing SoCs

Servers
- Improved power efficiency for high-density and edge environments

Networking
- Increasing data volume driven from rich media and high-speed devices

Storage
- Rapid data growth requires faster data access & local processing

Artificial Intelligence
- AI accelerators in cloud servers extract insights from large data sets

DesignWare® Interface, Foundation and Processor IP for Cloud Applications

- **Interface IP**: PCIe 5.0, CXL, HBM2/2E, DDR5, 112G Ethernet, Die-to-Die
- **Foundation IP**: specialty memories & logic libraries
- **Processor IP**: ARC HS Processors

In-Field Operation
Entered the software security & quality space in 2014

- Assembled and developed the broadest portfolio of solutions on the market; $358 million revenue in FY20
- Solutions allow software code developers to fix security and quality defects early in development
- Approximately $2-2.5 billion served market: fragmented, with numerous point solutions; recognition of cost of software failure has increased dramatically
- Synopsys Polaris Software Integrity Platform® enables customers to fully leverage the strength of the core products and integrate Synopsys into critical development workflows
Software Security & Quality Market

TAM\(^1\): ~$4.5-6.5B

SAM: ~$2-2.5B

1. AST, TVM/VA, cloud security

- Evolving, nascent market
- Growth drivers:
  - Omnipresence of software
  - Widespread connectivity exacerbates security issues
  - Significant business risk from breaches
  - Large development teams
- Market growth rate: mid-teens %
- Synopsys L-T multi-year growth objective: ~15-20% range as the market evolves*

Sources: Gartner, Forrester, IDC, other external and internal analyses

*This multi-year objective is provided as of May 19, 2021

  - Acquired 2015
  - Tools acquired:
    - Goanna (Coverity)

- **Forcheck**
  - Acquired 2016
  - Tools acquired:
    - Static analysis for Fortran

- **Tinfoil Security**
  - Acquired 2020
  - Tools acquired:
    - Developer-friendly dynamic application security testing (DAST) for APIs and web apps
The Most Complete Portfolio in the Industry

**Static Analysis**
- Find critical defects and vulnerabilities in code
- Runs in the dev environment and DevSecOps workflow
- OWASP Top 10 and CWE Top 25
- Automotive compliance (MISRA, ISO26262)

**Software Composition Analysis**
- Find known vulnerabilities in open-source & 3rd party code
- Identifies license and compliance risks
- Tests source and binaries in apps and containers
- Supply chain total health with SW BoM

**Dynamic Analysis**
- Tests running apps for security vulnerabilities
- Enables dev to fix security flaws early in the SDLC
- API Scanner for IoT devices and mobile backend servers
- Fuzzing for automotive protocols and 5G

**Security Services**
- Strategic analysis to build Software Security Initiative
- DevSecOps integration injects security into dev workflow
- Managed services provides full testing capabilities
- Architecture/design modeling eliminates software flaws
Polaris Software Integrity Platform®

Build secure, high-quality software faster

Comprehensive
SW security & quality across entire SW development lifecycle

Developer-centric
Automated tools integrate into existing DevOps toolchains

Higher Fidelity
Detect & fix vulnerabilities early
Recognized Leader in End-to-End Application Security

Growth Strategy

Leverage the Polaris Software Integrity Platform®

- Polaris, coupled with the strength of the core products, enables selling across the entire portfolio to increase revenue potential and create strategic relationships with customers

Highlight Differentiating Consulting Services

- Services for high-level benchmarking, security strategy/transformation, program development guidance and large product deployments

Refine and Scale Field

- Sales channel: leverage international presence; continually enhance capacity and focus on large enterprise customers, key verticals and the growing adoption of DevSecOps and securing the Cloud; indirect channel partner program
- Emphasis on customer success to ensure long-term relationships

Balance near-term growth and profitability with investments to capitalize on long-term opportunity
Synopsys: The Market and Technology Leader

Uniquely Positioned for Stability and Growth

• Robust End Markets Driving Growth
• Clear Technology Leadership
  ▶ Financial Strength and Growth
Excellent Financial Execution

Nearly 90% recurring revenue model with $4.8B non-cancellable backlog provides stability throughout the business cycle***

* A GAAP to non-GAAP reconciliation of FY16 to FY21E earnings per share is included at the end of this presentation
** FY21E reflects guidance provided as of May 19, 2021
*** We define recurring revenue as revenue generated from time-based products, multi-period IP contracts, and maintenance and services, for which revenue is recognized over time

- Repurchased more than $2B in stock since 2016
- Capital allocation priorities:
  - Internal investments
  - Buybacks and acquisitions
Corporate Social Responsibility

Our strong belief is that in addition to providing high-value, sophisticated technology, we must be responsible citizens and leaders in how we manage our strategy and operations, act as stewards for our environment, and advance positive social impact. We’re making good progress. For example:

- Taking climate action. In 2020, we pledged to reduce our GHG emissions by 25% reduction by 2024 over our 2018 baseline.
- Ensuring inclusion & diversity throughout our organization. Our I&D efforts have led to notably expanded gender diversity across the company and on our board.
- Enhancing employee engagement. Our efforts to ensure a highly motivated, productive workforce are frequent, thoughtful, and results-driven.
Our Smart Future CSR program provides a focus and structure for how we address both our own operational impact on the world and our ability to influence others around us.
CSR Advancements 2020

**REPORTING**
Second [CSR Report](#) published with alignment to GRI standards.

**HUMAN CAPITAL**
Updated the Compensation and Organizational Development Committee’s responsibilities to elevate the importance of human capital.

**INCLUSION & DIVERSITY**
Rolled out Inclusive Leaders Program for managers.
Board of Directors: 33% women

**ENVIRONMENT**
Entered into one of the world’s largest aggregated Virtual Power Purchase Agreement (VPPA) for the purchase of new renewable energy. Read the [press release](#).
Achieved CarbonNeutral® company certification for second consecutive year.

**SUPPLY CHAIN**
Joined [Renewable Energy Buyers Alliance](#) (REBA) to support our supply chain partners’ efforts to decarbonize.
