Chapter 1 Getting Started

You can run CODE V using either a *fixed* license or a *floating* license. A fixed license allows you to run CODE V only on the computer on which it is installed. A floating license, which is installed on a network server, allows you to run CODE V on any client computer installed on the same network. The number of users that can use CODE V concurrently is limited to a predetermined number by the license management software. For details about obtaining CODE V software and license key files, see Appendix A, “Using Synopsys SolvNet to Obtain CODE V Software and Licenses”.

Fixed License Installation

Fixed licenses are standalone software copies to be used on one computer only. You will need the following to run CODE V on a fixed-license system:

- **USB Dongle** – the dongle comes with a label that shows its Host ID.
- **License Key File** – a license key file that corresponds to your CODE V license and to the Host ID of the USB dongle you are using.
- **CODE V** – You need to obtain a copy of CODE V from SolvNet.

Floating License Installation

Floating licenses are run on a license server, and operate as a service to client computers attached to the network. The license server and client computers must be able to communicate with each other using the TCP/IP protocol. You will need the following to run CODE V:

License Server

- **USB Dongle** – the dongle comes with a label that show its Host ID.
- **License Key File** – a license key file that corresponds to your CODE V license and to the Host ID of the USB dongle you are using.
- **Floating License Manager software** provided by Synopsys OSG. This guide provides instructions for installing the OSG Floating License Manager (a Sentinel RMS license manager that has been customized for Synopsys OSG software), which is available on the Synopsys SolvNet website. See Appendix A, “Using Synopsys SolvNet to Obtain CODE V Software and Licenses” for details about obtaining this software.

CODE V Client

- **CODE V** – You need to obtain a copy of CODE V from SolvNet. Note that a license key file is not needed when installing CODE V on a client computer.

System Requirements

Current system requirements can be found online:

<http://optics.synopsys.com/codev/codev-hw-systems.html>

Contacting CODE V Technical Support

If you need help or have questions about CODE V that are not answered in the documentation or the online help, feel free to contact the CODE V Technical Support team by telephone, fax, or email. Technical support is available from 8 a.m. to 5 p.m., Pacific Time.

Technical Support Hotline (800) 243-8672 (U.S. and Canada only)

Telephone (626) 795-9101

Fax (626) 795-0184

Email: codev_support@synopsys.com

Chapter 2 Installing CODE V with a Fixed License

This chapter describes how to install CODE V with a fixed license, which allows you to run CODE V only on the computer on which it is installed. Note that all instructions are for the Microsoft Windows operating system.

These instructions assume that you have already downloaded from SolvNet the CODE V software and a license key file. If you have not done so, see “Using Synopsys SolvNet to Obtain CODE V Software and Licenses” on page 27.

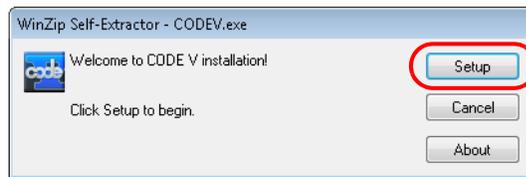

Installing CODE V

1. Log on to your computer as Administrator.
2. Navigate to the folder to which the CODEV installation package was copied.
3. Double-click the file **CODEV $version$.exe**.

where *version* is the version number for the release (for example, CODEV110FCS.exe).

The WinZip Self-Extractor for CODEV $version$.exe is displayed.

4. Click **Setup** to begin.

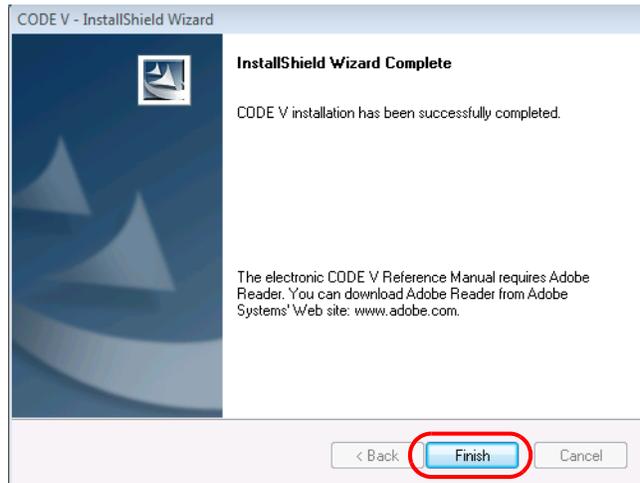

The installation files are extracted, and then the InstallShield Wizard is displayed.

5. Click **Next** to continue, and follow the instructions in the wizard.

When you get to the License Installations Options, be sure that the Fixed License option is selected (this is the default setting) and click **Next** to continue.

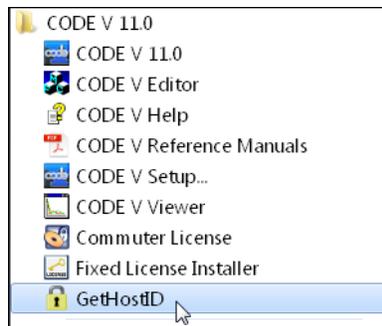

6. When the installation is complete, click **Finish** to close the wizard.

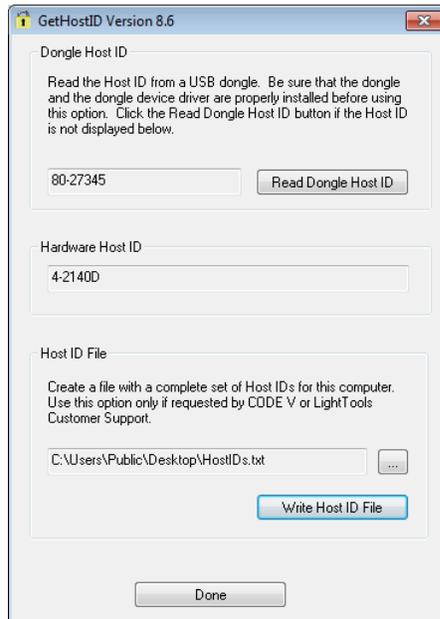

Obtaining the Host ID for a License Dongle

A license key is designed to work for only one USB dongle, so the license key is associated with a unique value encoded on the dongle called a *Host ID*. Because of this, you need to know the Host ID for the license dongle before you can retrieve a license key file. The Host ID is printed on a label on the USB dongle; if you're unable to read the ID on the label, you can also obtain the Host ID by running a program that reads it from the dongle. In the CODEV installation, the GetHostID utility is provided for this purpose. Follow these steps to run the GetHostID utility.

1. Insert the USB dongle in an active USB port.
2. Select the Windows Start menu, expand the CODEV group and select GetHostID, shown in the following figure.

The GetHostID utility is displayed, as shown in the following figure. In this examples, the Host ID for the USB dongle is **80-27345**.

3. Copy the Host ID to use when you retrieve your license key on the Synopsys SolvNet website. See “Retrieving License Keys” on page 35 for instructions.
4. Click Done to close the GetHostID utility.

After you retrieve your license key, go to “Installing a License Key File for a Fixed License” on page 5.

Installing a License Key File for a Fixed License

A valid license key file must be installed before you can run CODE V. This procedure assumes that CODE V is installed and that you have your license key file.

Note: If you start CODE V before you install your license key file, the License Manger Error dialog box will be displayed. Click **Install License** in that dialog box to display the Fixed License Installer and then skip to step 2 in the following procedure.

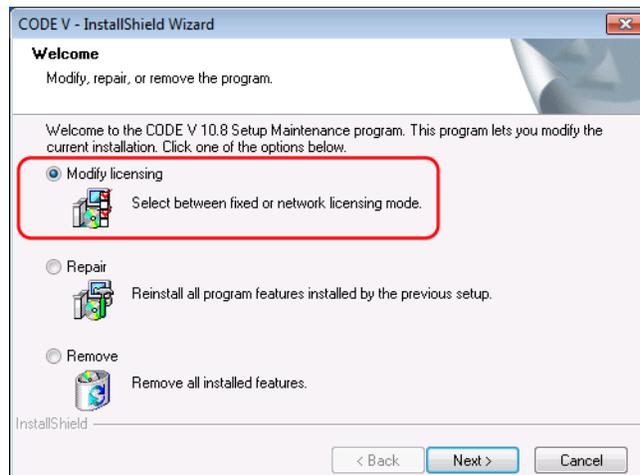

Follow these steps to install your license key file.

1. Insert the USB dongle in an active USB port.
2. To install your license key file, click **Start > Programs > CODE V > Fixed License Installer**.
The Fixed License Installer is displayed.
3. Click the browse button .
4. Navigate to the license key file, select it, and click **Open**.
The path to the license key file is shown in the Fixed License Installer.
5. Click **Install**.
The license key file is installed, and CODE V starts automatically.

Modifying License Options

If you need to change the type of license specified for your CODE V installation (fixed or floating), use the following procedure.

1. Select **Start > Control Panel**, and click **Programs and Features**.
2. Click the CODE V program you want to modify.
3. Click **Uninstall/Change**.
4. In the InstallShield Wizard *Welcome* page, the **Modify Licensing** option is preselected.

5. Click **Next**.
6. On the *License Installation Options* page, select the type of license that you want to use (if you are switching to a floating license, enter the server hostname or IPv4 address for the floating license server) and click **Next**.
7. On the *Maintenance Information* page, confirm your changes and click **Next**.
8. Click **Finish**.

Chapter 3 Installing CODE V with a Floating License

This chapter describes how to install a floating license on a network server, which allows you to run CODE V on any client computer installed on the same network. The number of users that can use CODE V concurrently is limited to a predetermined number by the licensing software. Note that all instructions are for the Microsoft Windows operating system.

The floating license capability is supported by the OSG Floating License Manager, which is a Sentinel RMS license manager that has been customized for Synopsys OSG software. If you install other Synopsys OSG software products, they will share the same license management software, and their license keys will be written to the same license key file. The applications cannot share licenses; they will share only the license server software.

Note: Installing a floating license requires system-administration level training, and should be performed by someone who is familiar with your network structure. Also, note that you must be logged in as administrator on the license server.

The steps for installing CODE V to run with a floating license are:

1. “Selecting a License Server” on page 7
2. “Installing the OSG Floating License Manager on the License Server” on page 8
3. “Network Firewall Settings” on page 14
4. “Installing the License Key for a Floating License” on page 17
5. “Installing CODE V on Client Machines” on page 19

Selecting a License Server

Before installing any software, you must identify the computer that will act as the floating license server. This must be a computer connected to a network that can grant access to one or more client machines.

Note: By default, the License Server communicates via port 5093. If you will be running CODE V across different subnets, you will have to configure your routers or firewalls to allow two-way communication across this port. See Appendix B: "Troubleshooting the CODE V Network License Installation".

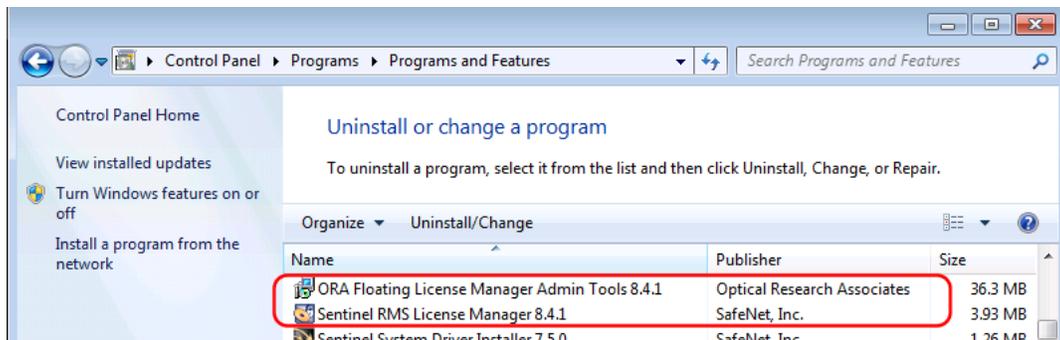

Installing the OSG Floating License Manager on the License Server

These instructions apply to the OSG Floating License Manager software that you download from SolvNet. Follow these steps to install the OSG Floating License Manager on the license server.

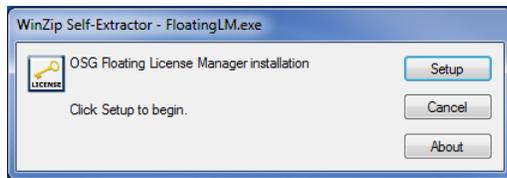

Note: If you have any other version of the Sentinel RMS license manager software (e.g., 8.4.1, 8.6), you must first uninstall that version as described below.

Before You Begin: To uninstall an earlier version of the Sentinel RMS software, click the Windows Start menu, and click **Control Panel > Programs > Programs and Features**. If you have the ORA Floating License Manager installed, be sure that you uninstall *both* the ORA Floating License Manager Admin Tools and the Sentinel RMS License Manager, shown in the following figure.

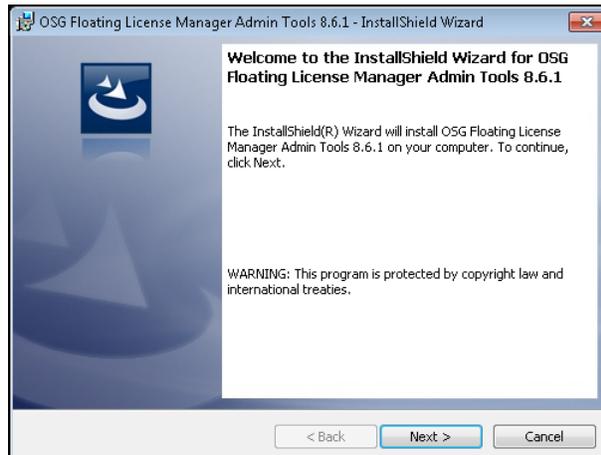

1. Log on to the license server with administrator privileges.
2. Navigate to the folder where you downloaded the OSG Floating License Manager, FloatingLM.exe.
3. Double-click the file FloatingLM.exe.

The WinZip Self-Extractor for the OSG Floating License Manager installation is displayed.

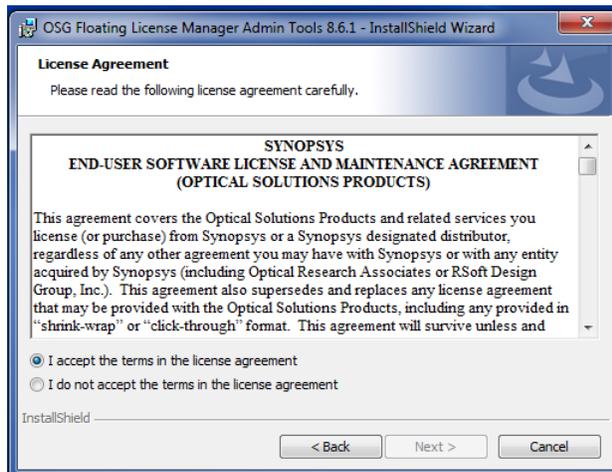

4. Click Setup.

The Welcome screen for the OSG Floating Manager Admin Tools wizard is displayed.

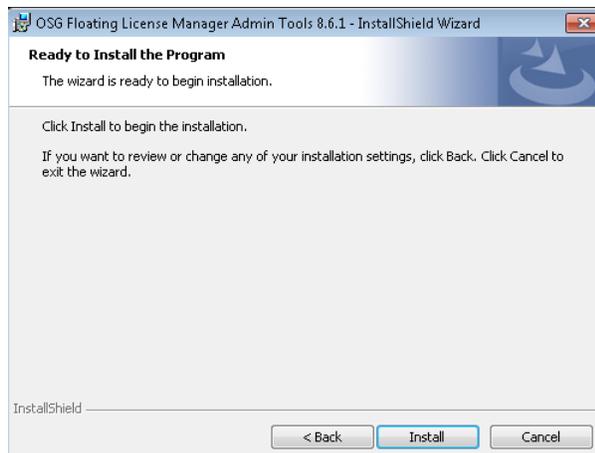

5. Click Next.

The License Agreement screen for the OSG Floating License Manager Admin Tools is displayed.

6. Click the I Accept option and click Next to continue.

The Ready to Install screen is displayed.

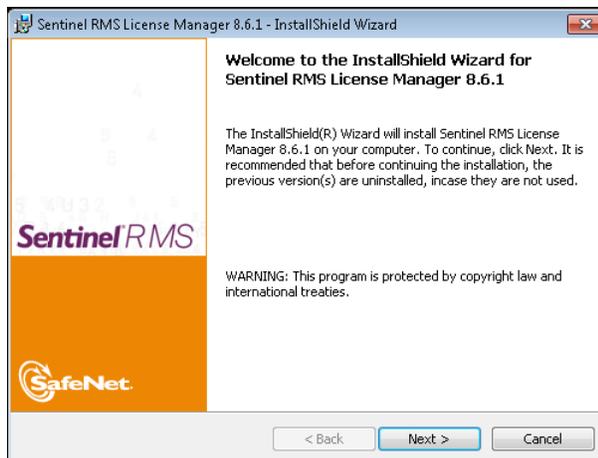

7. Click Install.

The progress screen is displayed while the software is installed.

8. Accept the default settings for all options.

The Welcome screen for the Sentinel RMS License Manager is displayed.

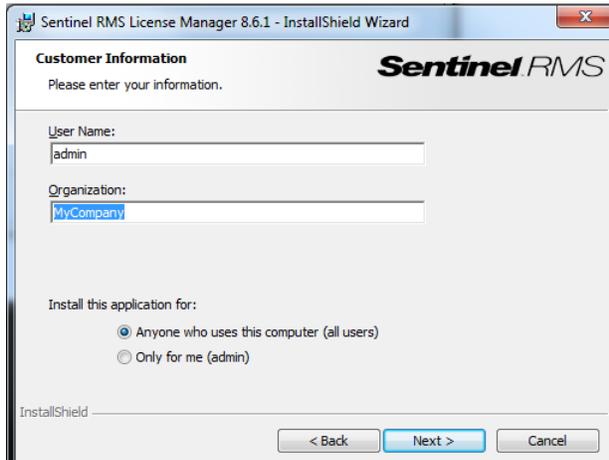

9. Click Next.

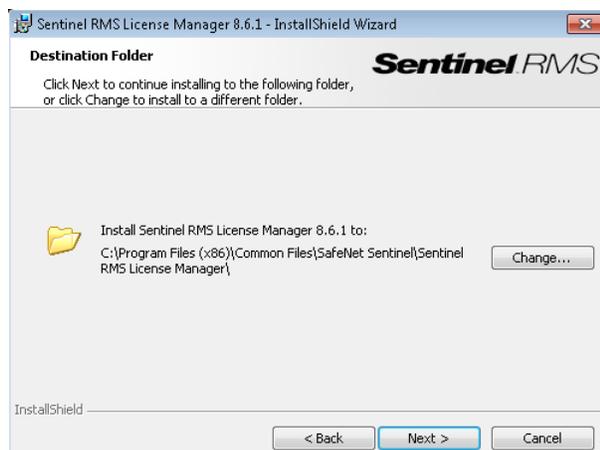

The License Agreement screen for the Sentinel RMS License Manager wizard is displayed.

10. Click the I Accept option and then click Next to continue.
The Customer Information dialog box is displayed.

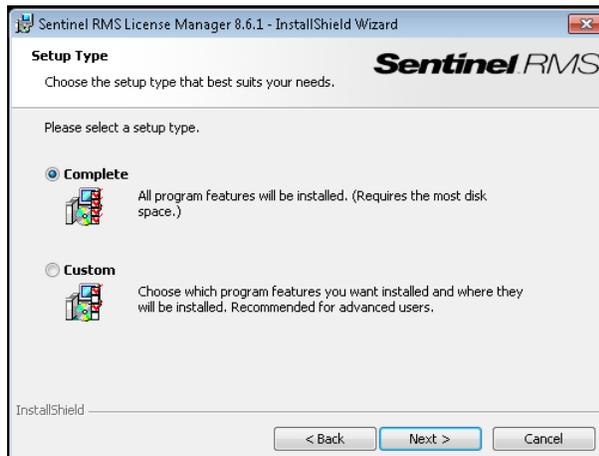

11. Click Next to accept the defaults and continue.
The Destination Folder screen is displayed.

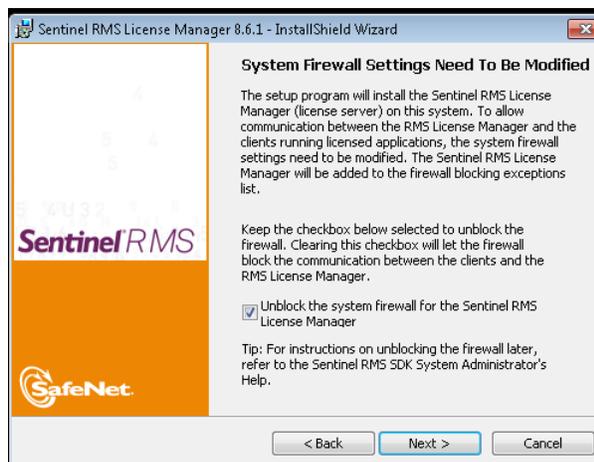

12. Click Next to accept the default and continue.

The Setup Type screen is displayed.

13. Click Next to accept Complete (recommended) and continue.

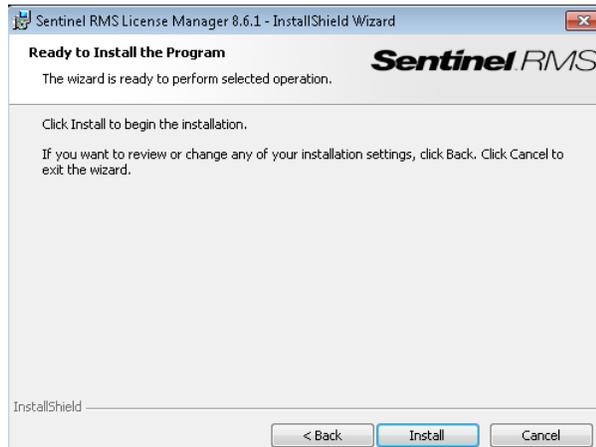

The System Firewall Settings screen is displayed.

14. Click Next (recommended).

If you choose to change the setting on this screen, see “Network Firewall Settings” on page 14 before proceeding.

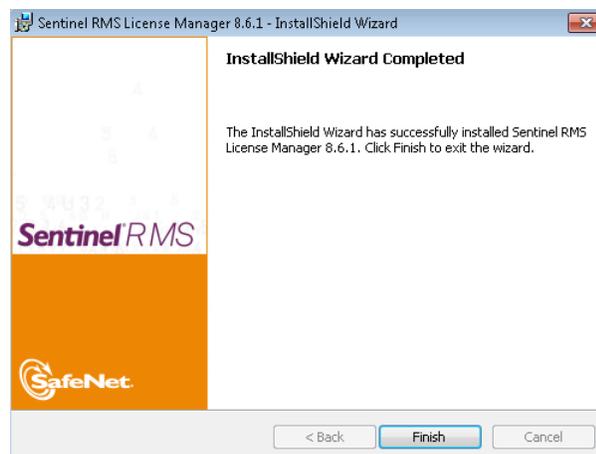

The Ready to Install screen is displayed.

15. Click Install.

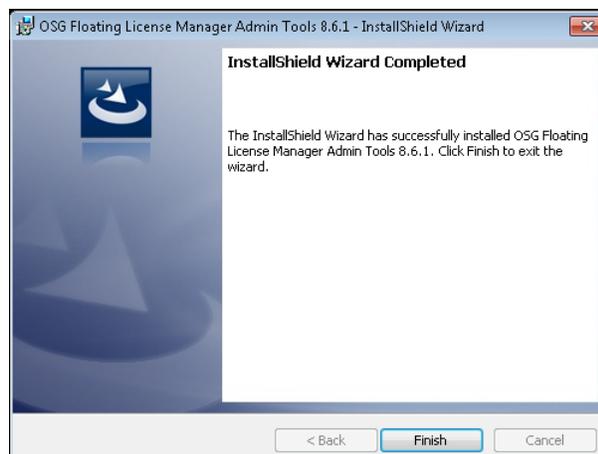

The progress screen is displayed while the software is installed.

When the installation is finished, the Completed screen for the Sentinel License Manager is displayed.

16. Click Finish.

The Completed screen for the OSG Floating License Manager Admin Tools is displayed.

17. Click Finish.

The installation is complete.

18. Reboot your computer if prompted to do so.

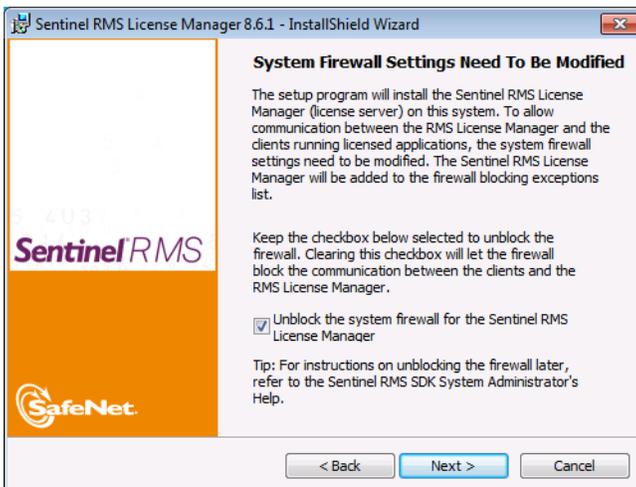

If you already have a CODE V license key, skip to *Installing the License Key for a Floating License* on page 17. If you do not yet have a license key, continue with *Obtaining the Host ID for a License Dongle* on page 15.

Network Firewall Settings

By default, installing the Sentinel RMS Floating License Manager adds one or more inbound rules for the executable (lservnt.exe).

This action is enabled by the check box in the InstallShield Wizard dialog shown in the following figure. If you choose to bypass this action by deselecting this check box, CODE V may not be able to obtain the license needed to run.

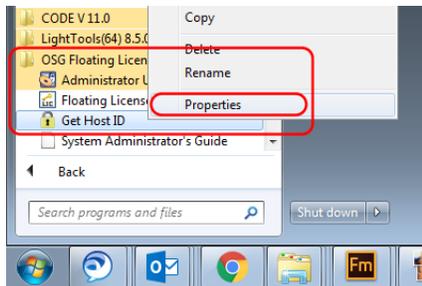

As the dialog explains, the firewall blocking exceptions can be added at a later time. Additionally, if you want strict firewall settings, you can allow communications only for port 5093 in the Ports setting of the Inbound Rules.

Obtaining the Host ID for a License Dongle

A license key is designed to work for only one USB dongle, so the license key is associated with a unique value encoded on the dongle called a *Host ID*. Because of this, you need to know the Host ID for the license dongle before you can request a license key. The Host ID is printed on a label on the USB dongle; if you're unable to read the ID on the label, you can also obtain the Host ID by running a program that reads it from the dongle. In the OSG Floating License Manager installation, the GetHostID utility is provided for this purpose. Follow these steps to run GetHostID.

1. Insert the USB dongle in an active USB port on the license server.
2. To display the correct Host ID in the GetHostID utility, you need to modify the shortcut to the utility as follows:
 - a. Click the Windows Start menu, select OSG Floating License Manager group, **right-click** GetHostID and select Properties, shown in the following figure.

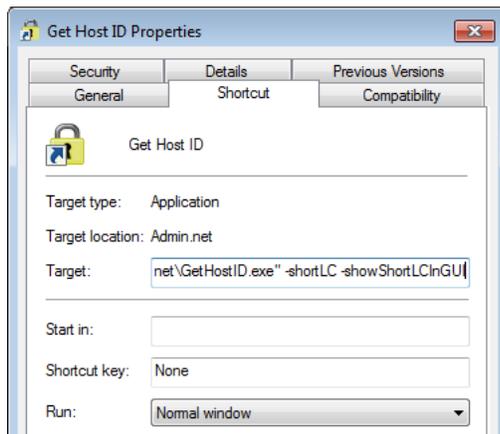

- b. In the GetHostID Properties dialog box, click the Shortcut tab. For the Target command, add the following text at the end of the line:

-shortLC -showShortLCInGUI

so that the complete command looks like this:

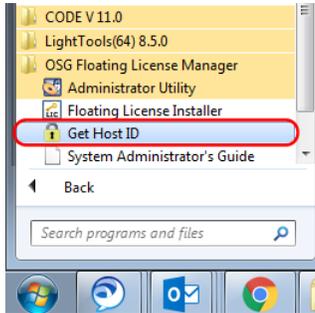

"C:\Program Files (x86)\Common Files\Optical Research Associates\FLM\Admin.net\GetHostID.exe" -shortLC -showShortLCInGUI

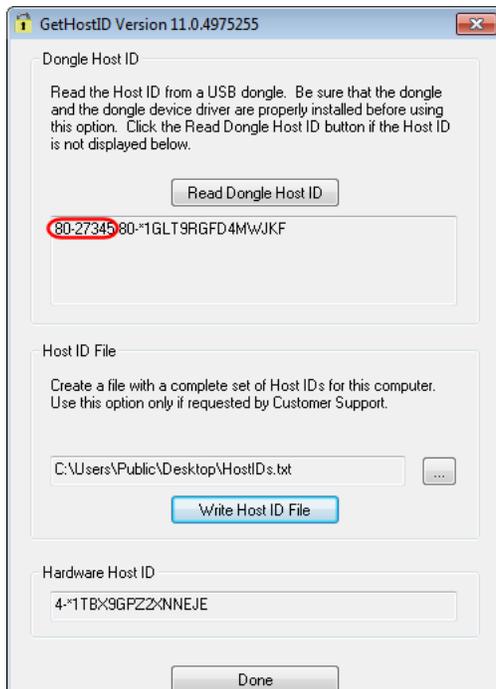

Be sure that there is a space between **.exe"** and **-shortLC**.

- c. Click OK to accept the change and close the GetHostID Properties dialog box.

3. Select the Windows Start menu, expand the OSG Floating License Manager group, and select GetHostID, shown in the following figure.

4. The GetHostID utility is displayed, as shown in the following figure. Under the Read Dongle Host ID button, a short Host ID and a long Host ID are displayed side by side. To obtain a license key at this time, you need only the *short* Host ID (the first eight characters). In this example, the Host ID for the USB dongle is **80-27345**. (Note that in some display configurations, the two Host IDs are displayed farther apart.)

5. Copy the short Host ID to retrieve your license key file on the Synopsys SolvNet website. See “Retrieving License Keys” on page 35 for instructions.
6. Click Done to close the GetHostID utility.

After you retrieve your license key, go to “Installing the License Key for a Floating License” on page 17.

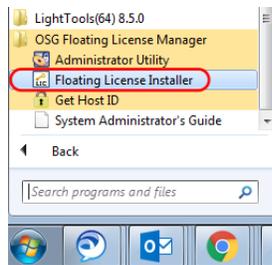

Installing the License Key for a Floating License

After you install the license server software and retrieve a license key, you need to install the license key on the license server before client machines can successfully run CODE V. The Floating License Installer is provided for this purpose.

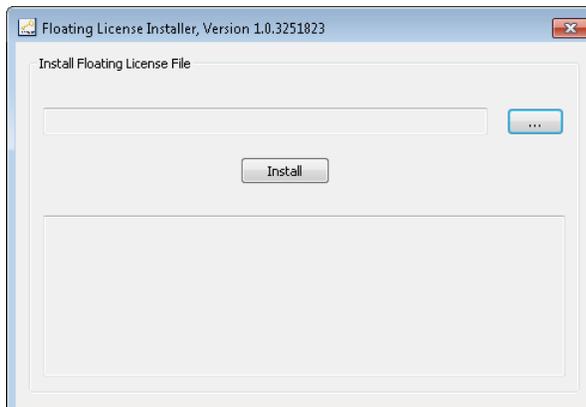

This procedure assumes that you have already obtained a valid CODE V *license.dat* file from the SolvNet SmartKeys web page. If you have not done so, see “Retrieving License Keys” on page 35 for instructions.

Follow these steps to install your license key file.

1. Make sure that the license dongle is inserted in an active USB port on the license server.
2. Click the Windows **Start** button on the taskbar, and select **All Programs > OSG Floating License Manager > Floating License Installer**.

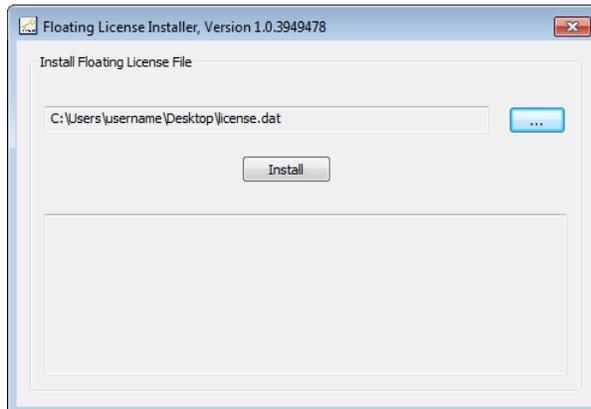

The Floating License Installer is displayed, as shown in the following figure.

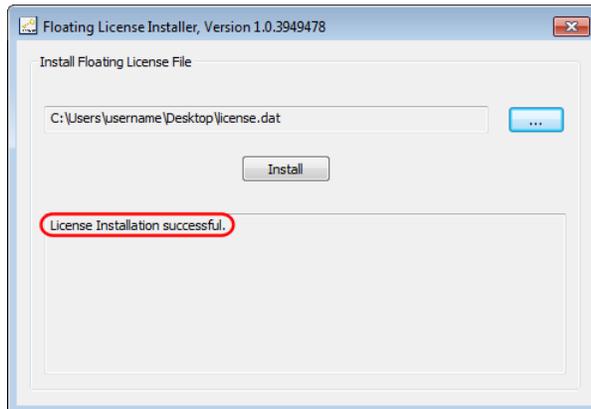

3. Click the Browse button .
4. In the Open dialog box, navigate to the license key file, select it, and click Open.

The Open dialog box is closed, and the path to the license key file is shown in the Floating License Installer.

5. Click the Install button.

The license key file is installed, and the Success dialog box is displayed.

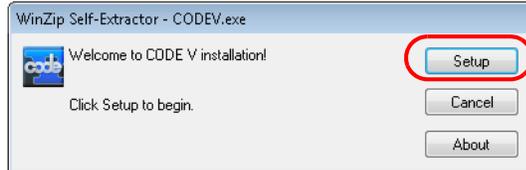

6. To close the Floating License Installer, click the red X in the top right corner.
Continue with "Installing CODE V on Client Machines" on page 19.

Installing CODE V on Client Machines

CODE V must be installed on each client machine where it will be used. During the installation, choose **Floating License** as the license type, and enter the name of the license manager in the **Server Hostname** field.

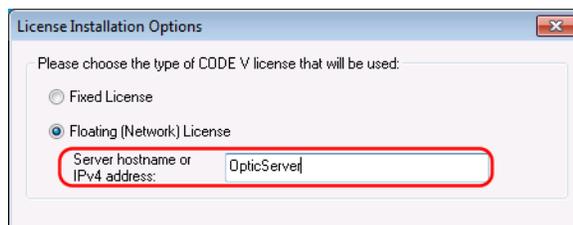

These instructions assume that you have already downloaded CODE V from SolvNet.

1. Log on to your computer as Administrator.
2. If you downloaded CODE V, navigate to the folder where the installation package was copied.
3. Double-click the file **CODE V $version$.exe** where $version$ is the version number for the release (for example, CODE V110FCS.exe).
The WinZip Self-Extractor for CODE V $version$.exe is displayed.
4. Click **Setup** to begin.

The installation files are extracted, and then the InstallShield Wizard is displayed.

5. Click **Next** to continue, and follow the instructions in the wizard.
6. When you get to the License Installations Options, select the **Floating License** option.
7. Next to the Server Hostname or IPv4 Address option, enter the name or the IPv4 address for the computer on which the license manager was installed and click **Next** to continue. In the following figure, the name *OpticServer* is used as an example; be sure to enter the name of your license server.

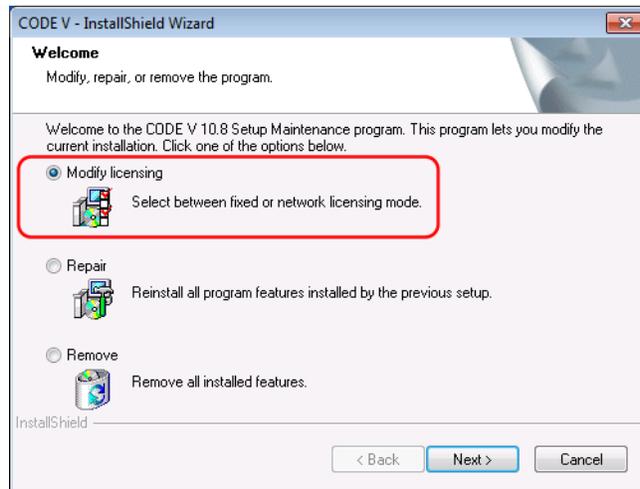

8. When the installation is complete, click **Finish** to close the wizard.

Modifying License Options

If you need to change the type of license specified for your CODE V installation (fixed or floating), use the following procedure.

1. Select **Start > Control Panel**, and click **Programs and Features**.

2. Click the CODE V program you want to modify.
3. Click **Uninstall/Change**.
4. In the InstallShield Wizard *Welcome* page, the **Modify Licensing** option is preselected.

5. Click **Next**.
6. On the *License Installation Options* page, select the type of license that you want to use (if you are switching to a floating license, enter the server hostname or IPv4 address for the floating license server) and click **Next**.
7. On the *Maintenance Information* page, confirm your changes and click **Next**.
8. Click **Finish**.

Chapter 4 Administrating Floating Licenses

In general, there is nothing that you need to do to administrate floating licenses. As long as the license server machine is operational, connected to the network, and is running the Sentinel service, licenses are available to clients.

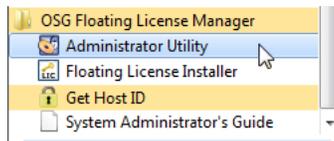

Monitoring License Use

It is possible for all available licenses to be in use, which would prevent additional clients from running CODE V. In such cases, a system administrator can use the WlmAdmin utility to determine to whom the module licenses have been allocated.

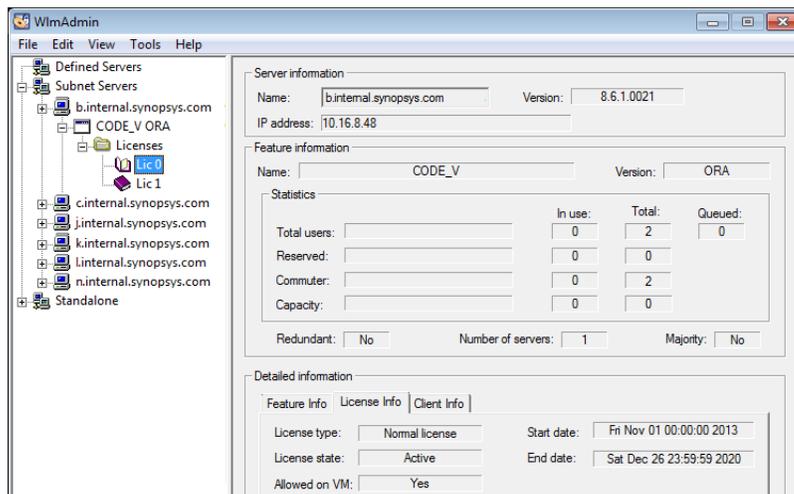

Note: To use the WlmAdmin utility, either you must be the person who started the license server, or you must have administrator privileges.

1. To start the utility, click the Windows **Start** menu and select **All Programs > OSG Floating License Manager > Administrator Utility**.

2. Expand the list of modules below the license server hostname.

The details presented in the dialog box indicate which client machine and username have checked out the licenses.

You can also use the WlmAdmin utility to obtain other licensing activity information, such as license servers detected and details on active licenses. For more information about how to use the WlmAdmin utility, see the *Sentinel System Administrator's Guide*. After the Sentinel software is installed, this manual is available by selecting the Windows Start menu and selecting **All Programs > OSG Floating License Manager > System Administrator's Guide**.

Note: Not all functions described in the *Sentinel System Administrator's Guide* are supported by CODE V.

All license manager activity is recorded in the file usage.log, which is located in C:\Windows\SYSWOW64.

Improving Access to CODE V Licenses with the Sentinel License Manager

By default, CODE V licenses are available to anyone on your server on a first-come, first-served basis. Therefore, you can use CODE V immediately without using the Sentinel License Manager. However, if and when you want the access to these licenses more finely tuned for your work priorities, you can reserve copies and deny access with the Sentinel License Manager.

Before using the Sentinel License Manager, consider how you want to organize your groups, as there are many ways to do so. Remembering the following points will help you to decide how to organize your groups:

- Any license not specifically reserved can be used by anyone on your server.
- After you add a user to a group, you can change the status for that user to Included (access allowed) or Excluded (access denied).
- If you want to exclude all members of a group from using license tokens for a feature, you can specify 0 licenses (called tokens).

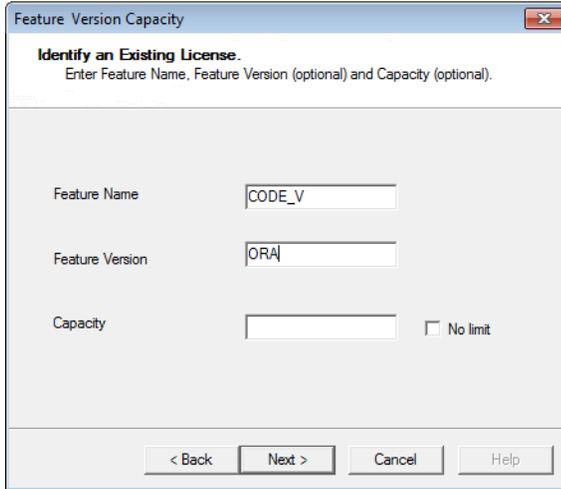

For example:

- If you have different departments in your organization, you may want to enter each department as a separate group, assign a certain number of license tokens to each group, and designate each group member as Included or Excluded. You can change this designation on a regular basis as your work priorities change.
- Another arrangement would be to create one group for preferred users and one group for everyone else. In the preferred user group, you could designate all members as Included and assign as many licenses as you can allow. For the second group, you could enter everyone else in the company and the remaining licenses (tokens) and designate which people are Included and which are Excluded. You can then change these Included and Excluded designations on a regular basis as the work load changes.

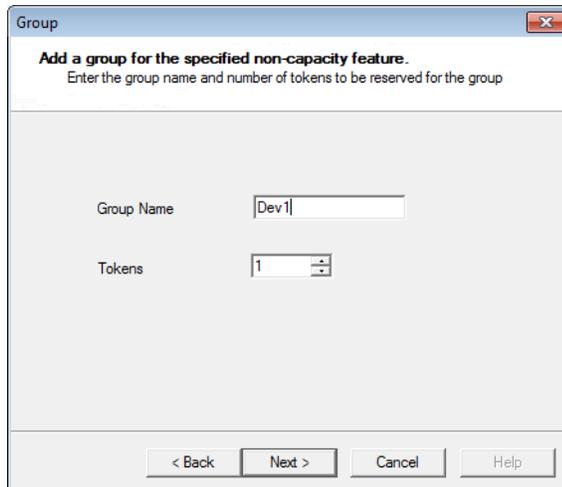

After you decide on an arrangement, you can use the Sentinel License Manager to implement it by setting up a *reservation file* as follows:

1. Start the utility by clicking the Windows **Start** menu and select **All Programs > OSG Floating License Manager > Administrator Utility**.
2. From the menu at the top of the WlmAdmin window, choose **Edit > Reservation File** to open the Wlsgmgr window.
3. Choose **File > New**. This selection clears the system for setting up a new member group.

4. 4. Select a feature. CODE V does not have a separate set of features, so CODE V is the only feature choice.
 - a. Choose **Feature > Add**. The *Add License Reservation Wizard* opens. Click **Next** to continue. The *Feature Version* window opens.
 - b. For Feature Name, enter **CODE_V** (upper case CODE, underscore, upper case V).

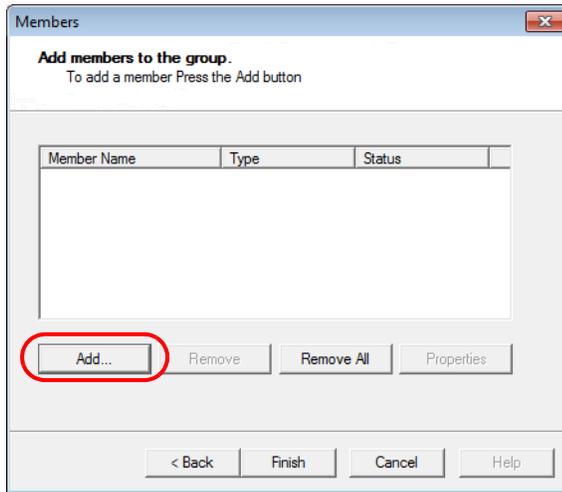

- c. For Feature Version, enter **ORA** (upper case).
 - d. Click **Next** to open the *Group* window.
5. Establish a user group:
 - a. Enter a name of your choosing that identifies the user group for whom you want to allow or deny access.

- b. In the *Tokens* field, enter the number of licenses of the available licenses to reserve for that group.
 - c. Click **Next** to open the *Members* window.
6. Add each member to the group. Add members who will be allowed access, as well as members who will be denied access.

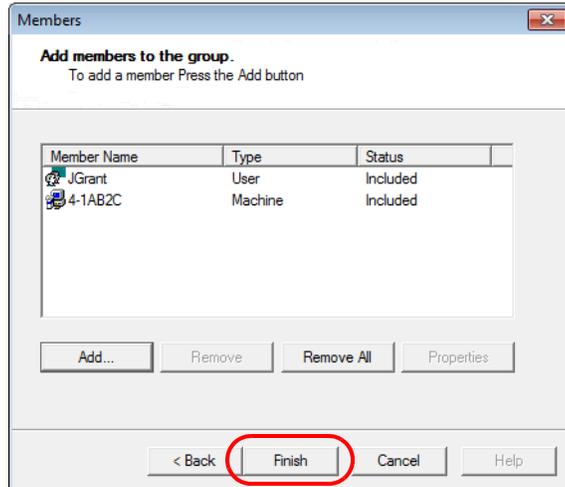

- a. Click the **Add** button.

- b. In the **Name of Member** dialog box, enter either the user's login name or machine (host) ID.

- c. Select either **User** or **Machine**, depending on which you have provided in the previous step.
- d. Click **Included** for members who will be allowed access and **Excluded** for members who will be denied access.
- e. Click **OK**.
- f. Repeat the process of adding a member for each user in the group.
- g. In the *Add Members to Group* window, click **Finish**.

7. Repeat the process of selecting features, establishing groups, and adding members for each group (steps 4, 5, and 6, above).
8. Select **File > Save As** and find the directory where the license manager is installed.

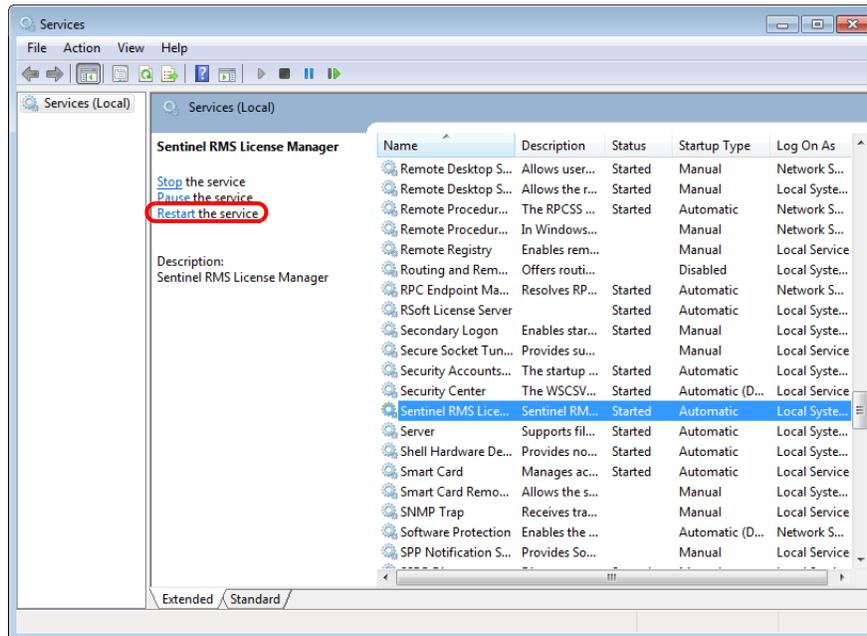

By default, the license manager is installed in:

C:\Program Files (x86)\Common Files\SafeNetSentinel\Sentinel RMS License Manager\WinNT

A file called lsreserv is created and saved at this location. The License Manager references this file to determine which users have access to each feature.

9. Restart the Sentinel RMS License Manager, as follows.
 - a. From the Windows Start button, select **Start > Control Panel**.
 - b. Select **System and Security > Administrative Tools > Services**.
 - c. Select the **Sentinel RMS License Manager** in the list of services and select the **Restart** option, shown in the following figure.

Chapter 4 Administrating Floating Licenses

Appendix A Using Synopsys SolvNet to Obtain CODE V Software and Licenses

Software and license keys for CODE V are available for download from the Synopsys SolvNet website. This appendix describes how to use the website to download this software products and the license keys required to use it.

Note: For customers working with distributors, please contact your local CODE V software distributor to obtain your software and license. See the [Synopsys Optical Solutions Group Global Contacts](#) page for contact information.

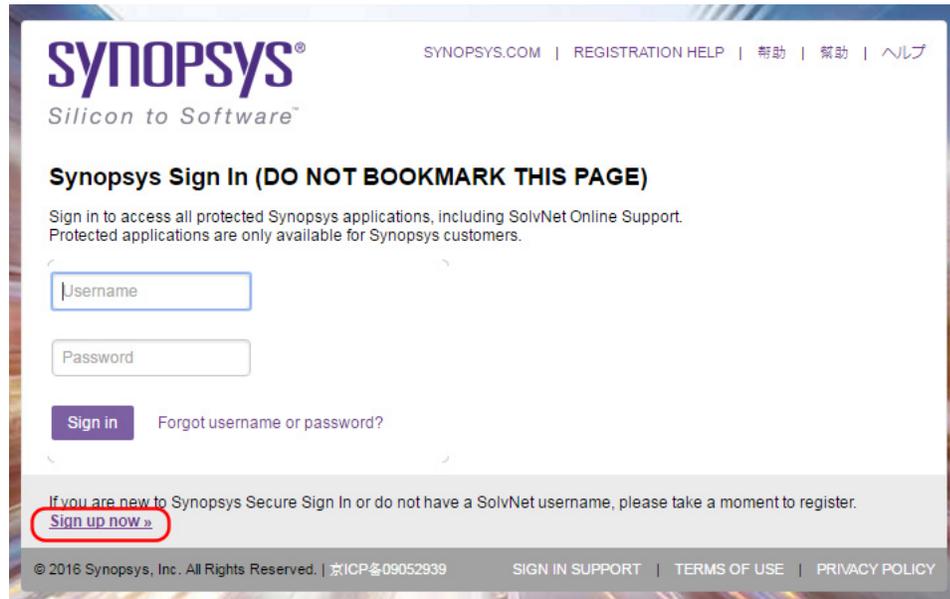

The process is described in the following procedures.

1. *Signing Up for a SolvNet Account* on page 28
2. *Downloading CODE V Software from SolvNet* on page 29
or
Ordering Media (CDs/DVDs) on page 31
3. *Installing CODE V* on page 33
4. *Retrieving License Keys* on page 35

Signing Up for a SolvNet Account

Before you can download CODE V software and license keys, you must sign up for a Synopsys SolvNet account. If you already have a SolvNet account, you can skip to *Downloading CODE V Software from SolvNet* on page 29.

1. Go to <https://solvnet.synopsys.com> and click the **Sign Up Now** link.

2. Follow the instructions for New User Registration.

During the registration process, you will need to enter your company's Site ID. If you do not know your company's Site ID, please contact solvnetfeedback@synopsys.com to request it. Be sure to include your company name and address in the email request.

SolvNet will send you a confirmation email. Follow the link in the email to complete the registration process.

Downloading CODE V Software from SolvNet

Follow these steps to download the CODE V product. If you are unable to download software, you can order a CD or DVD instead. See *Ordering Media (CDs/DVDs)* on page 31 for instructions.

1. Go to <https://solvnet.synopsys.com> and enter your User Name and Password to sign in.
2. Click Downloads.
3. All Synopsys products currently licensed at your company will be listed.

The screenshot shows the SolvNet website interface. At the top, there is a search bar and navigation links for SYNOPSYS.COM, FEEDBACK, SITE MAP, HELP, and SIGN OUT. Below this is a main navigation bar with links for Home, Documentation, Support, Downloads (highlighted with a red box), Training, Methodology, and My Profile. The main content area is titled 'HOME > DOWNLOADS' and features two tabs: 'My Product Releases' and 'My Newest Releases'. Under 'My Product Releases', there is a list of products: LightTools, LucidDrive, LucidShape, LucidShape HDR Viewer, and LucidShape Lite. A 'New!' indicator is present above the list. To the right, there is an 'IP Products' section with a search bar and a list of products: Analog IP Selector, Memory & Logic IP Selector, and My Site IP. Further right, there are two promotional boxes: 'SpyGlass Release Information' with a 'Read Now' link, and '2014.12 Release Requires Installer 3.2' with a 'Download Now' link. At the bottom right, there is a link for 'CODE V, LightTools, RSoft'.

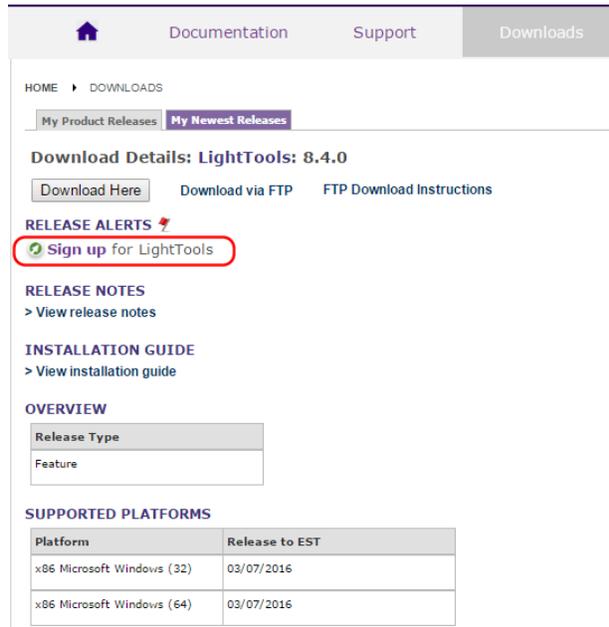

4. Select the product you want to download.

This screenshot is similar to the previous one, but the 'LightTools' product in the 'My Product Releases' list is highlighted with a red box. The rest of the page content remains the same.

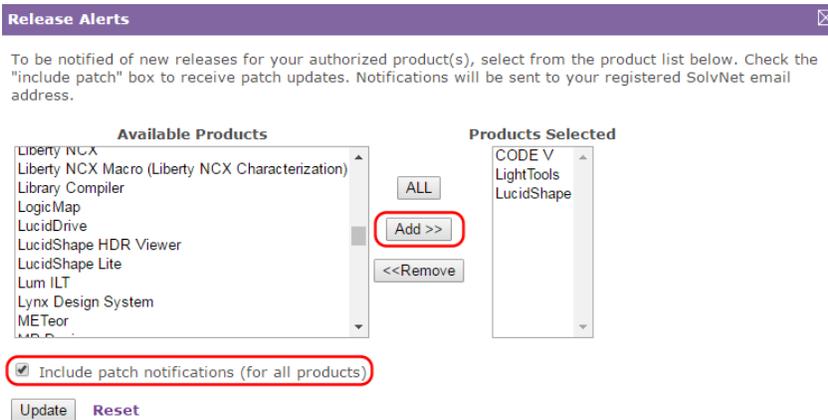

5. Select the version you would like to download.

The screenshot shows the 'LightTools' product page. The 'Downloads' menu item is highlighted. The page title is 'LightTools' and it prompts the user to 'Choose your version number from the list below.' A list of version numbers is displayed: 8.4.0, 8.3.0-1, 8.3.0, and 8.2.0. The '8.4.0' version is highlighted with a red box.

The **Downloads** page is displayed.

6. Click the **Release Alerts** link to display a **Release Alerts** options that allow you to subscribe to Release Notification emails from SolvNet. These emails let you know when a new version of CODE V is available for download.

- a. Click the product name for which you would like to receive notifications or click **ALL** to receive notifications for all products in the list.
- b. Click the **Add** button.
- c. Click the **Include patch notifications** check box. This allows you to receive notifications of CODE V service releases.
- d. Click the **Update** button.

You are returned to the **Downloads** page.

7. On the **Downloads** page, click **Download Here**.
8. On the Electronic Software Transfer (EST) page, click YES, I AGREE TO THE ABOVE TERMS to continue.
9. Click the **Download** button, shown in the following figure, to begin downloading the software.

- Floating license customers: if you are a system administrator setting up a floating license server, you can also click the **Download** button for the FloatingLM.exe to download the OSG Floating License Manager at this time. See *Installing CODE V with a Floating License* on page 7 for installation instructions.

Note: The FloatingLM.exe installs the new OSG Floating License Manager, which is provided as an optional upgrade and is compatible with LightTools and CODE V, as well as the LucidShape family of products. You can also continue to use the Sentinel RMS License Manager v. 8.6.1, which was available in previous releases and is compatible with LightTools and CODE V.

HTTP may be used for downloads from the rev, rev_o, rev_a, ip, exp, la and auth directories.
[Explanation of EST directories](#)
 For downloads from the /pub directory use FTP connection <ftp.synopsys.com>

Action	File	Size
<input type="button" value="Download"/>	LightTools64840FCS.exe	File size : 1661 MB
<input type="button" value="Download"/>	LightTools840FCS.exe	File size : 1603 MB
<input type="button" value="Download"/>	README_LightTools_8.4.txt	File size : 2 KB
<input type="button" value="Download"/>	checksum_info.txt	File size : 228 Bytes

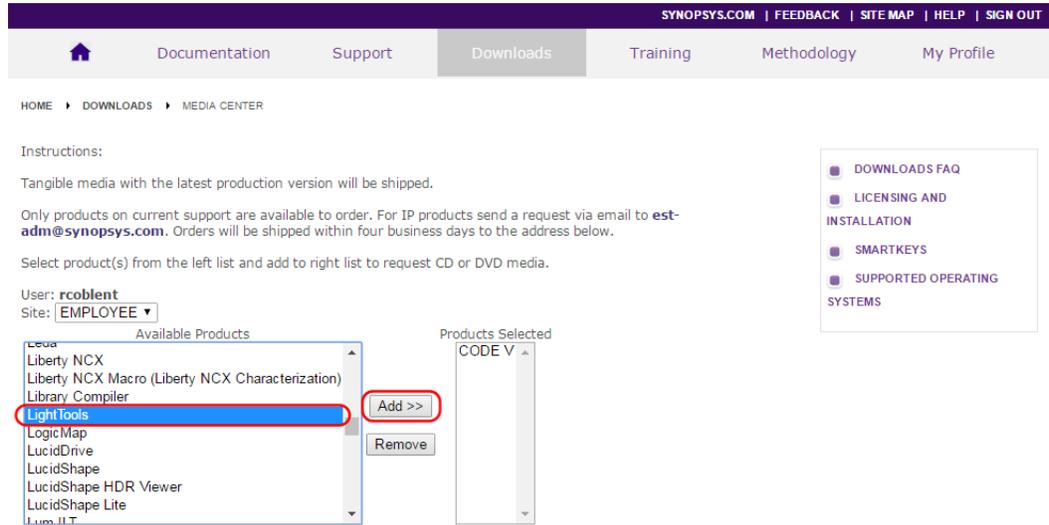

Ordering Media (CDs/DVDs)

If you are unable to download software and would like to order media (CD or DVD) instead, you can do this directly on the Synopsys SolvNet website. Follow these steps to order media.

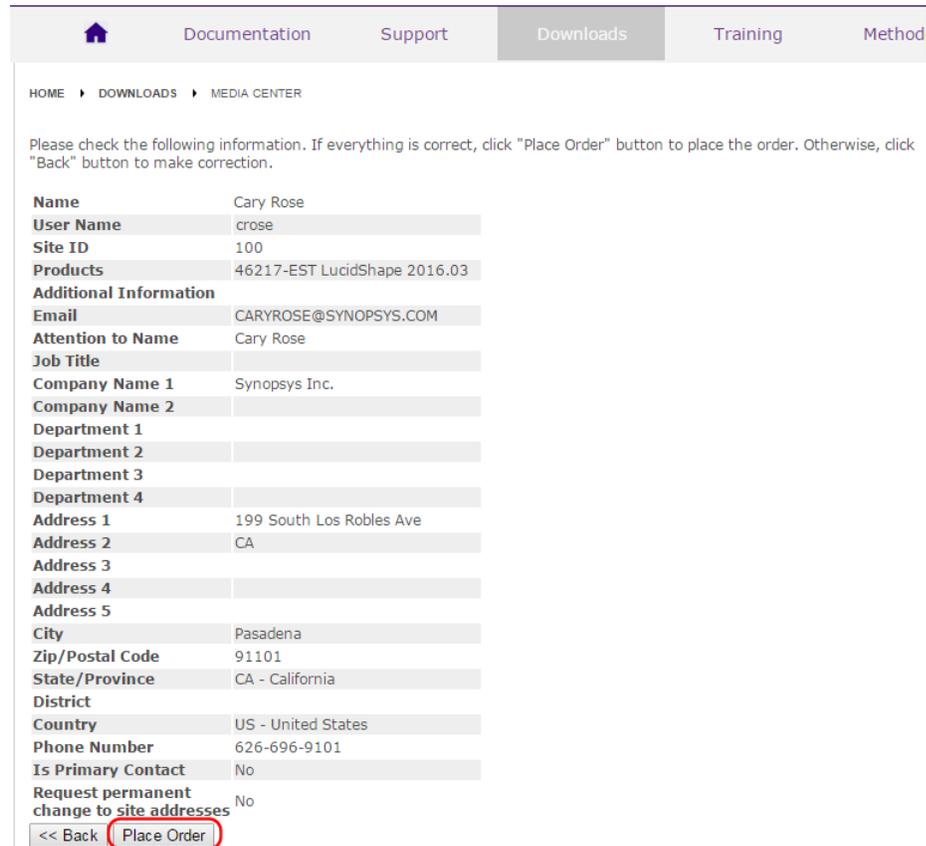

- Go to <https://solvnet.synopsys.com> and enter your User Name and Password to sign in.
- Click Downloads.
- Click the **MediaCenter** link in the lower right corner.

The screenshot shows the Synopsys SolvNet website interface. At the top, there is a navigation bar with links for Documentation, Support, Downloads, Training, Methodology, and My Profile. The Downloads menu is active. Below the navigation bar, there are sections for 'My Product Releases' and 'IP Products'. On the right side, there are several promotional boxes for SpyGlass Release Information, 2014.12 Release Requires Installer 3.2, CODE V, LightTools, RSoft, and LucidShape Users Customer Support, and Missing Product? Contact Us. At the bottom right, there are two links: 'DOWNLOADS FAQ' and 'MEDIACENTER', with the latter being highlighted with a red circle.

- On the **Media Center** page, select the product (e.g., CODE V, LightTools, etc.) and click the **Add** button.

- Complete the Shipping Address information and click **Continue**.
- Review the shipping request, shown in the following figure, and click **Place Order**.

Installing CODE V

Instructions for installing CODE V software and license keys are provided in the following chapters:

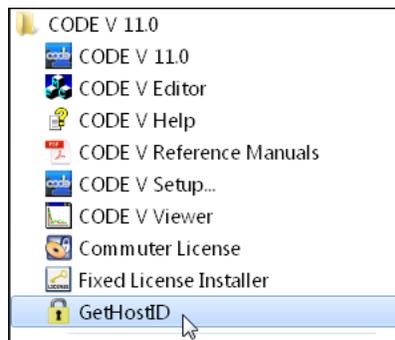

- *Getting Started* on page 1 - lists CODE V system requirements and tells you how to contact CODE V Support.
- *Installing CODE V with a Fixed License* on page 3 - With a fixed license, you install the product, the license dongle, and the license key on the computer where you want to run CODE V.
- *Installing CODE V with a Floating License* on page 7 - With a floating license, you install the license dongle and license key on a network server and the product on one or more client machines where you want run CODE V; you also install the OSG Floating License Manager on the network server to manage the licenses.

After you install the CODE V product, continue with *Retrieving License Keys* on page 35.

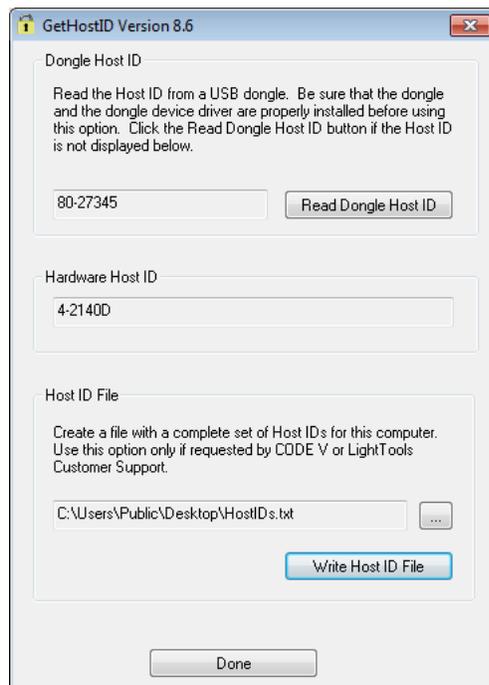

Obtaining the Host ID for a License Dongle

A license key is designed to work for only one USB dongle, so the license key is associated with a unique value encoded on the dongle called a *Host ID*. Because of this, you need to know the Host ID for the license dongle before you can retrieve a license key. The Host ID is printed on a label on the USB dongle; if you're unable to read the ID on the label, you can also obtain the Host ID by running a program that reads it from the dongle. In the CODE V installation, the GetHostID utility is provided for this purpose. Follow these steps to run GetHostID.

1. Insert the USB dongle in the USB port.
2. Select the Windows Start menu, expand the CODE V group, and select GetHostID, shown in the following figure.

The GetHostID utility is displayed, as shown in the following figure. In this example, the Host ID for the USB dongle is **80-27345**.

3. Copy the Host ID and go on to *Retrieving License Keys* on page 35.

Retrieving License Keys

A license key is a file containing licensing information for your specific USB dongle. You can obtain license keys using the SmartKeys web page on the Synopsys SolvNet website. Follow these steps to obtain your license keys.

1. Navigate to the SmartKeys page on SolvNet.

You can go to SmartKeys directly using this link: <https://solvnet.synopsys.com/SmartKeys>, or you can navigate there from the SolvNet Downloads page by clicking the **SmartKeys** link in the lower right corner.

The screenshot shows the Synopsys SolvNet website. At the top, there is a search bar and navigation links for SYNOPSYS.COM, FEEDBACK, SITE MAP, HELP, and SIGN OUT. Below this is a main navigation bar with links for Documentation, Support, Downloads, Training, Methodology, and My Profile. The 'Downloads' link is active. The main content area is titled 'HOME > DOWNLOADS' and features two tabs: 'My Product Releases' and 'My Newest Releases'. Under 'My Product Releases', there is a list of products: LucidDrive, LucidShape, LucidShape HDR Viewer, and LucidShape Lite. To the right, there is a section for 'IP Products' with links for 'Search for IP', 'Analog IP Selector', 'Memory & Logic IP Selector', and 'My Site IP'. Further right, there are several promotional boxes for 'SpyGlass Release Information', 'Synopsys Test Case Packager', 'CODE V, LightTools, RSoft, and LucidShape Users', and 'Missing Product?'. At the bottom right, there is a vertical list of links: DOWNLOADS FAQ, MEDIACENTER, LICENSING AND INSTALLATION, SMARTKEYS (highlighted with a red circle), and SUPPORTED OPERATING.

2. On the SolvNet SmartKeys home page, click the **Key Retrieval** link.

The screenshot shows the Synopsys SolvNet SmartKeys home page. At the top, there is a search bar and navigation links for SOLVNET HOME, SYNOPSYS.COM, FEEDBACK, SITE MAP, HELP, and SIGN OUT. Below this is a main navigation bar with links for Documentation, Support, Downloads, Training, Methodology, My Profile, and Search. The 'Downloads' link is active. The main content area is titled 'HOME > SMARTKEYS' and features a purple header for 'SolvNet SmartKeys'. Below the header, there is a 'Customer Education' section with links for 'SolvNet Online Support' and 'Worldwide Support Centers'. A 'Welcome Cary Rose' message is displayed, stating 'You last visited SmartKeys on October 19, 2016 at 4:10 PM PST.' Below this, there is a 'Key Retrieval' section with a description: 'This function enables license key retrieval of unexpired keys for all Host IDs tied to a specific. Site ID.' To the left, there is a sidebar with links for 'SmartKeys Home', 'Key Retrieval' (highlighted with a red circle), and 'Monthly TSL Key Redemption'. Below the sidebar, there is a 'Monthly TSL Key Redemption' section with a description: 'This function enables redemption of pre-purchased license "tokens". You must provide your Site ID, Host ID, token start date and the number of tokens you wish to redeem.'

The SmartKeys Key Retrieval page is displayed.

You can retrieve a license key for a single USB dongle, or you can retrieve license keys for all Host IDs at your company.

3. To obtain a license key for a single USB dongle, enter the Host ID of your CODE V USB dongle in the Host ID (Optional) field. If you do not know the Host ID value for your USB dongle, see *Obtaining the Host ID for a License Dongle* on page 33.

To obtain license keys for all products and all Host IDs at your company, leave the Host ID (Optional) field blank and go on to step 4.

4. Click **Retrieve Licenses**, shown in the following figure.

The screenshot shows the Synopsys SolvNet SmartKeys interface. The main heading is "Key Retrieval". Below the heading, there are instructions for "Site ID" and "Host ID (optional)". The "Host ID (optional)" instruction includes a link for CODE V & LightTools Users. The form below has the following fields: "Site ID" (dropdown menu with "26674 - Synopsys ..." selected), "Site ID (Override)" (text input), "Host ID (Optional)" (text input), and "Attachment Option" (dropdown menu with "Text Format" selected). A red asterisk indicates mandatory fields. At the bottom of the form, there are links for "Back", "Retrieve Licenses" (highlighted with a red box), "Reset", and "Help".

Your CODE V license key will be delivered as a text file attached to an email from the SmartKeys system. If you did not enter a Host ID in step 3, you will receive a separate email with a single license key attached for each Host ID at your company. The email will include the Host ID for which the license key is valid.

5. Save the license key to a convenient location on your computer. You need to access this file to activate CODE V.
6. See one of the following procedures for instructions on installing the license key to activate your CODE V product.
 - *Installing a License Key File for a Fixed License* on page 5
 - *Installing the License Key for a Floating License* on page 17

Appendix B Troubleshooting the CODE V Network License Installation

If problems arise with CODE V security, a **License Manager Error** dialog box displays an error message. Below are a few common security errors with their causes and resolutions. If you are unable to correct the problem, please contact CODE V Support (codev_support@synopsys.com).

Problem Adding License Keys to the License Server

Problem: Sentinel: Error [19]: Failed to add license code...

Cause: This general error message indicates that the license keys were not applied successfully in the license manager. This can occur if the file where the keys are being read is corrupted. However, this error can also occur if license keys that have already been successfully entered are entered a second time.

Solution: Verify that the license file contains license keys for the current version of CODE V being installed, and not for an earlier version (the version number is listed in the comments of the license file received from Synopsys). Also verify that the license file has not become corrupted. This might occur if the license file has been edited (that is, lines containing license keys are changed or become line wrapped incorrectly).

Problems Starting CODE V

Problem: Error #18b - No valid license code for version x.xx found.

Cause: There has not been a valid license key entered for this version of CODE V.

Solution: See “Installing the License Key for a Floating License” on page 17 for instructions on installing license keys.

Problem: Error #0xC800100D - License code for version x.xx has expired.

Cause: The license key for CODE V has expired, or the PC date is before the start date of the license.

Solution: Verify that the date on the computer is correct. Install the license key for this version of CODE V on the license manager machine according to the instructions in “Installing the License Key for a Floating License” on page 17. If a new license key is needed, contact CODE V Customer Service.

Problem: Error #8001008 - License manager is not responding. Verify license manager host is available and license manager process is running.

Cause: The Sentinel Floating License Manager program has been disabled.

Solution: Restart the license manager program. To do this: On the PC where the license server is installed, open the Control Panel (select **Start > Settings > Control Panel**), select **Administrative Tools** and then **Services**. Locate and right-click on **Sentinel** in the dialog box, and select the **Start** option on the pop-up menu.

Cause: The license manager machine is unavailable.

Solution: Solution: Verify that the license manager machine is available on the network.

Cause: The ORA_LSHOST environment variable is not set or is incorrectly set.

Solution: Check to make sure the license server name is correct by choosing the **File > License Manager** menu in CODE V. If the license server name is incorrect, modify it. See “Modifying License Options” on page 19 for instructions.

Problem: **An unexpected licensing error has occurred.**

Cause: An error has occurred with the license manager. The **License Manager Error** dialog box will contain more specific information about the problem, which is provided by the Sentinel Floating License Manager program. If you are still having difficulties identifying the problem, contact CODE V Customer Service for guidance.

Appendix C Synopsys® Free and Open-Source Licensing Notices for CODE V Products

Document Overview

This document includes licensing information relating to free and open-source software ("FOSS") included with Synopsys's® CODE V® products (the "SOFTWARE"). The terms of the applicable FOSS license(s) govern Synopsys's® distribution and your use of the SOFTWARE. Synopsys® and the third-party authors, licensors, and distributors of the SOFTWARE disclaim all warranties and all liability arising from any and all use and distribution of the SOFTWARE. To the extent the FOSS is provided under an agreement with Synopsys® that differs from the applicable FOSS license(s), those terms are offered by Synopsys® alone.

Synopsys® has reproduced below copyright and other licensing notices appearing within the FOSS packages. While Synopsys® seeks to provide complete and accurate copyright and licensing information for each FOSS package, Synopsys® does not represent or warrant that the following information is complete, correct, or error-free. SOFTWARE recipients are encouraged to (a) investigate the identified FOSS packages to confirm the accuracy of the licensing information provided herein and (b) notify Synopsys® of any inaccuracies or errors found in this document so that Synopsys® may update this document accordingly.

Certain FOSS licenses (such as the GNU General Public Licenses, GNU Library/Lesser General Public Licenses, Affero General Public Licenses, Mozilla Public Licenses, Common Development and Distribution Licenses, Common Public License, and Eclipse Public License) require that the source code corresponding to distributed FOSS binaries be made available to recipients or other requestors under the terms of the same FOSS license. Recipients or requestors who would like to receive a copy of such corresponding source code should submit a request to Synopsys® by post at:

Synopsys
Attn: Open Source Requests
700 East Middlefield Road
Mountain View, CA 94043

Please provide the following information in all submitted FOSS requests:

- the FOSS packages for which you are requesting source code;
- the Synopsys® product (and any available version information) with which the requested FOSS packages are distributed;
- an email address at which Synopsys® may contact you regarding the request (if available); and
- the postal address for delivery of the requested source code.

libpng versions 0.5, May 1995, through 0.88, January 1996, are Copyright (c) 1995, 1996 Guy Eric Schalnat, Group 42, Inc.

For the purposes of this copyright and license, "Contributing Authors" is defined as the following set of individuals:

Andreas Dilger Dave Martindale Guy Eric Schalnat Paul Schmidt Tim Wegner

The PNG Reference Library is supplied "AS IS". The Contributing Authors and Group 42, Inc. disclaim all warranties, expressed or implied, including, without limitation, the warranties of merchantability and of fitness for any purpose. The Contributing Authors and Group 42, Inc. assume no liability for direct, indirect, incidental, special, exemplary, or consequential damages, which may result from the use of the PNG Reference Library, even if advised of the possibility of such damage.

Permission is hereby granted to use, copy, modify, and distribute this source code, or portions hereof, for any purpose, without fee, subject to the following restrictions:

1. The origin of this source code must not be misrepresented.
2. Altered versions must be plainly marked as such and must not be misrepresented as being the original source.
3. This Copyright notice may not be removed or altered from any source or altered source distribution.

The Contributing Authors and Group 42, Inc. specifically permit, without fee, and encourage the use of this source code as a component to supporting the PNG file format in commercial products. If you use this source code in a product, acknowledgment is not required but would be appreciated.

A "png_get_copyright" function is available, for convenient use in "about" boxes and the like:

```
printf("%s",png_get_copyright(NULL));
```

Also, the PNG logo (in PNG format, of course) is supplied in the files "pngbar.png" and "pngbar.jpg (88x31) and "pngnow.png" (98x31).

Libpng is OSI Certified Open Source Software. OSI Certified Open Source is a certification mark of the Open Source Initiative.

END-USER LICENSE AGREEMENT FOR THIS SOFTWARE

This End-User License Agreement ("EULA") is a legal agreement between you (either an individual or a single entity) and the mentioned author of this Software for the software product identified above, which includes computer software and may include associated media, printed materials, and "online" or electronic documentation ("SOFTWARE PRODUCT"). By installing, copying, or otherwise using the SOFTWARE PRODUCT, you agree to be bound by the terms of this EULA. If you do not agree to the terms of this EULA, do not install or use the SOFTWARE PRODUCT.

SOFTWARE PRODUCT LICENSE

The SOFTWARE PRODUCT is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties. The SOFTWARE PRODUCT is licensed, not sold.

The definition of SOFTWARE PRODUCT does not include any files generated by the SOFTWARE PRODUCT, such as compiled script files in the form of standalone executables.

1. GRANT OF LICENSE

This EULA grants you the following rights:

Installation and Use. You may install and use an unlimited number of copies of the SOFTWARE PRODUCT.

Reproduction and Distribution. You may reproduce and distribute an unlimited number of copies of the SOFTWARE PRODUCT either in whole or in part; each copy should include all copyright and trademark notices, and shall be accompanied by a copy of this EULA. Copies of the SOFTWARE PRODUCT may be distributed as a standalone product or included with your own product.

Commercial Use. You may use the SOFTWARE PRODUCT for commercial purposes. You may sell for profit and freely distribute scripts and/or compiled scripts that were created with the SOFTWARE PRODUCT.

Reverse engineering. You may not reverse engineer or disassemble the SOFTWARE PRODUCT.

2. COPYRIGHT

All title and copyrights in and to the SOFTWARE PRODUCT (including but not limited to any images, photographs, animations, video, audio, music, text, and "applets" incorporated into the SOFTWARE PRODUCT), the accompanying printed materials, and any copies of the SOFTWARE PRODUCT are owned by the Author of this Software. The SOFTWARE PRODUCT is protected by copyright laws and international treaty provisions. Therefore, you must treat the SOFTWARE PRODUCT like any other copyrighted material.

MISCELLANEOUS

If you acquired this product in the United Kingdom, this EULA is governed by the laws of the United Kingdom. If this product was acquired outside the United Kingdom, then local law may apply.

Should you have any questions concerning this EULA, or if you desire to contact the author of this Software for any reason, please contact him/her at the email address mentioned at the top of this EULA.

LIMITED WARRANTY

1. NO WARRANTIES

The Author of this Software expressly disclaims any warranty for the SOFTWARE PRODUCT. The SOFTWARE PRODUCT and any related documentation is provided "as is" without warranty of any kind, either express or implied, including, without limitation, the implied warranties or merchantability, fitness for a particular purpose, or non-infringement. The entire risk arising out of use or performance of the SOFTWARE PRODUCT remains with you.

2. NO LIABILITY FOR DAMAGES

In no event shall the author of this Software be liable for any damages whatsoever (including, without limitation, damages for loss of business profits, business interruption, loss of business information, or any other pecuniary loss) arising out of the use of or inability to use this product, even if the Author of this Software has been advised of the possibility of such damages. Because some states/jurisdictions do not allow the exclusion or limitation of liability for consequential or incidental damages, the above limitation may not apply to you.

[END OF LICENSE]

Glossary of Terms

Floating license server (machine)

The computer onto which the license server software is installed. This computer will serve licenses to client machines upon request. The application itself need not be installed on the license server machine.

License server software

The software that regulates and protects application use; CODE V uses Sentinel RMS™. The license server software is installed on and runs as a service on the license server machine (or host). This service communicates with client machines over the network, and is responsible for checking out licenses to (and checking in licenses from) those client machines.

Client (machine)

The client, or client machine, is a computer that has CODE V installed on it, and is configured to use floating licenses (not fixed licenses).

Protected application

A single instance of CODE V, which is running on a client machine using a floating license.

Glossary of Terms

SYNOPSYS[®]
