

RSoft LED Utility

The RSoft LED Utility™ Provides Optimized Optical Structures with Maximum Extraction Efficiency and Far-Field Patterns

Features

- Arbitrary LED geometry can be created in the RSoft CAD Environment™
- Periodic arrays can easily be generated using new Dynamic Array Layout
- Material dispersion can be included
- Rigorous optical modeling via RSoft FullWAVE™ tool
- User-defined radiation spectrum
- Outputs extraction ratio and radiation patterns

This Specialized Utility is Built on Top of the Powerful FullWAVE Simulation Tool

For more information, please contact Synopsys' Optical Solutions Group at (626) 795-9101, visit [synopsys.com/optical-solutions/rssoft](http://www.synopsys.com/optical-solutions/rssoft), or send an e-mail to optics@synopsys.com.
