

# The Total Economic Impact™ Of Seeker® – Interactive Application Security Testing (IAST) by Synopsys

FORRESTER®

Through an in-depth interview with one customer and data aggregation, Forrester concluded that Synopsys Seeker has the following three-year financial impact.

## SUMMARY OF BENEFITS

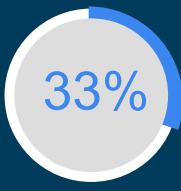

3-year risk adjusted

\$692K

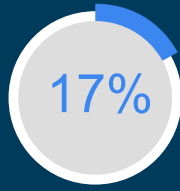

Security vulnerabilities expense avoidance

\$445K

Reduced risk of a data breach

\$229K

Reduced false positive rate

## VOICE OF THE CUSTOMER

“With Seeker, we discover the defects during the development process. To get feedback on security issues during development before the resource is allocated to another project enables us to work more agilely.”

*Development Team Manager,  
Insurance Industry*

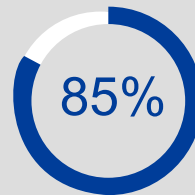

“Seeker has had a positive return on investment because we reduce the costs of the software development projects, we work more agilely because we discover the problems early, and we create better quality code.”

*Development Team Manager,  
Insurance Industry*

## SYNOPSYS SEEKER BY THE NUMBERS

**Lower**  
remediation costs

**Decreased**  
reliance on external  
security consultants

**Zero**  
false positives
