

Simpleware Software Solutions for Life Sciences

From 3D Images to Models

Applications in Life Sciences

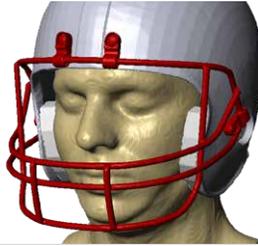

Orthopedics

Accurate Anatomical Models

- Automated and semi-automated tools to segment anatomies
- Combine CAD implants and anatomical data
- Accurately quantify bone geometries
- Export multi-part FE/CFD meshes to solvers

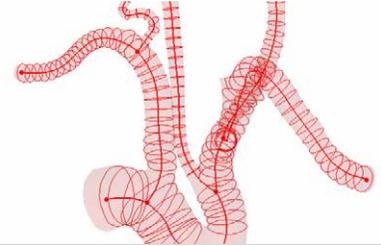

Product Design & Analysis

Biomechanics for Consumer Products

- Customize product designs to individual anatomies
- Virtually check fit of designs on the human body
- Export models to simulate real-world performance
- Gain better insight for future products by analyzing real anatomies
-

Physiological Flows

Cardiovascular and Respiratory Systems

- Reslice images along vessels and airways
- Combine anatomical data with stent models
- Mesh boundary layers and add custom inlets and outlets for fluid flow analysis
- Quantify vessels with centerline network tools

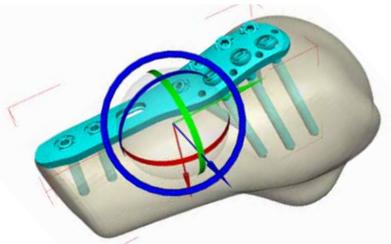

EM & Neuromodulation

Human Body Models for Simulation

- Use automated and semi-automated segmentation tools
- Integrate CAD designs like MRI coils or electrodes with image data
- Easy to use registration tools for positioning devices
- Generate and export simulation-ready meshes

Medical Device R&D

Device and Image Integration

- Rapidly integrate CAD devices into CT/MRI scans
- Research human/device interactions
- Automate repeatable operations with scripting
- Simulation-ready meshes suitable for analyzing device performance

3D Printing Preparation

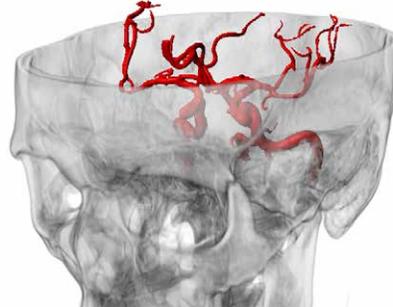

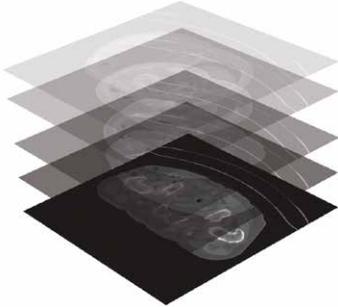

High-Quality STL Production

- Generate watertight STL files ready for 3D Printing
- Obtain conforming interfaces for multi-material printing
- Add internal lattices to reduce weight
- Use printed models as a teaching aid

From Image Processing through to Model Generation

Simpleware ScanIP

Import

Modalities

- MRI
- CT
- Micro-CT
- Ultrasound
- Confocal microscopy

Formats

- DICOM
- DICONDE
- 2D image stacks (BMP, JPEG, TIFF...)
- Raw image data (RAW, VOL...)

Options

- Co-registration of multiple datasets
- Store and manage DICOM tags
- Anonymization

Visualization

Volume rendering

- GPU rendered
- Combine with surface/mask/mesh renderings

Object visualization

- Range of 2D and 3D visualization options
- Overlay surface contours in 2D views
- Interactive image reslicing
- Export 3D PDF

Animations

- Rotate, clip and fly-through
- Export video files
-

Image Processing

Image and mask filters

- Noise reduction
- Smoothing and morphological filters
- Align, rescale and resample
- Robust Boolean operations

Segmentation

- Threshold, floodfill and painting
- Interactive 3D editing tools
- Advanced parameterized region-growing tool
- Contour-based magnetic lasso

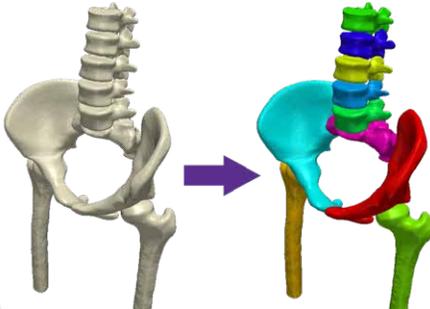

The Simpleware Solution

Synopsys' Simpleware™ software provides an industry-leading, comprehensive 3D image processing platform for handling 3D scan data. Accurately process images with a wide range of tools for visualizing data, obtaining image statistics and carrying out segmentation, right through to generating 3D printing and simulation-ready models.

Improve Life Sciences Workflows

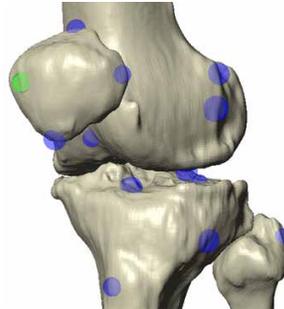

Simpleware software is accessible to both beginners and more advanced users in the Life Sciences. The intuitive interface provides quick-and-easy access to a range of powerful tools. Rapidly handle data from multiple imaging sources and save time when working with anatomical and design data.

From Image Processing through to Model Generation

Advanced Segmentation

- Tools for handling challenging image data with poor contrast, artefacts and low quality
- Image-space lofting (interpolation) tool
- 3D wrap tool for scaffold-based segmentation
- Split/merge watershed-based segmentation
- Greyscale-based slice-to-slice propagation
- Local surface correction to compensate for artefacts

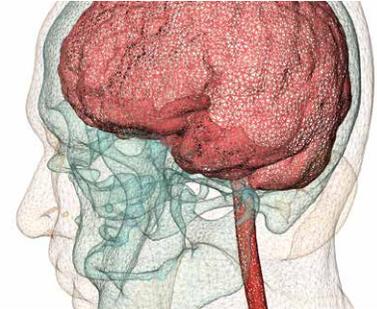

Measurements & Statistics

Interactive tools

- Simple quick statistics and measurements
- Generate and probe centerlines networks
- Shape fitting and statistics
- Wall thickness analysis

Statistics framework

- Thoroughly interrogate image data, generated models, or centerlines
- Extensive range of metrics
- Highly flexible for creating custom statistics templates
- Generate PDF reports describing your data

Surface Model/Mesh

- Fast creation of STLs ready for 3D printing
- Smoothing that preserves volume and topology
- High-quality triangulation (no need for fixing or post processing)
- Guaranteed watertight surfaces
- Feature-based mesh decimation
- Conforming surfaces between multiple parts
- Multiple export formats supported

Have Confidence in your Product Designs

Simpleware software is ideal for rapidly testing out different design iterations involving consumer products and the human body. Achieve reliable results every time with straightforward image processing, measurements, and export of robust STL and NURBS CAD files. Generate guaranteed high-quality FE meshes to evaluate biomechanical performance under real-world conditions.

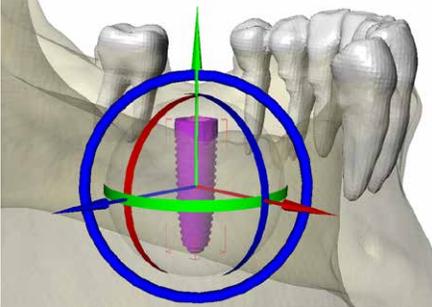

Customize your Workflow with Scripting

All functionality within Simpleware products is accessible from a fully documented API with bindings available for Python, C# and Java. Use this API to automate repeatable workflows, build wizards and integrate custom plugins. By using our macro recording functionality, you can generate code without needing any prior experience.

From Image Processing through to Model Generation

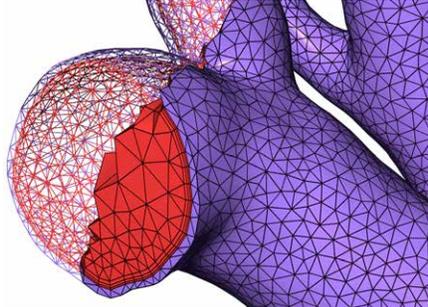

Simpleware CAD

CAD Integration

- Fast and easy-to-use tools to combine CAD and image data
- Import CAD files (STL, IGES, STEP...)
- Landmark-based CAD registration with auto "Snap" option
- Surface deviation analysis for comparing objects
- Automatic fixing of erroneous CAD data on import
- Robust Boolean operations
- Preserve CAD edges when combined with image data
- Surface filters to smooth, decimate...

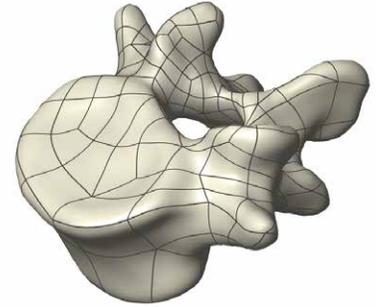

Simpleware FE

FE/CFD Volume Mesh

- Conforming multi-part volume meshes
- Feature-based and user-defined mesh refinement
- Per part meshing controls
- Define contacts and node sets
- Hounsfield material mapping for FE exports
- Boundary layer meshing
- Dedicated native exports for all major solvers
- Optimize element qualities against a choice of metrics
- Import existing meshes and assign material properties

Simpleware NURBS

NURBS/CAD Models

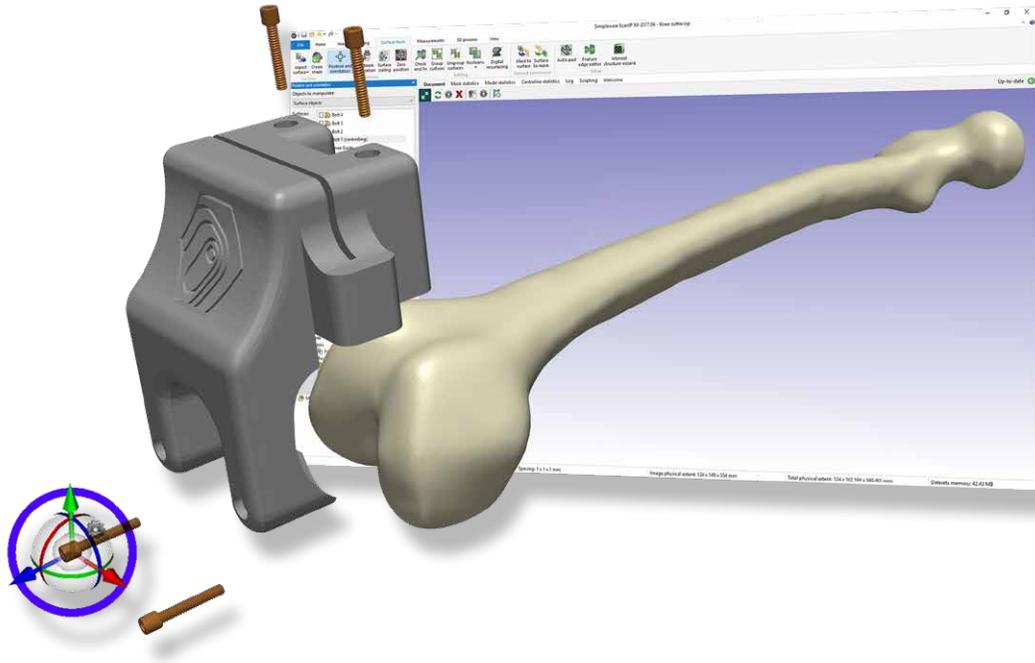

- Automated NURBS patch fitting
- Choice of algorithms
- Highly accurate conversion
- Inspection tool to check models
- Models suitable for further design work/simulation
- Export as IGES and STEP

Integrate Image and CAD Data

Unique capabilities allow you to combine CAD models within 3D image data to capture realistic anatomical details whilst accurately maintaining the design features of the CAD data. Avoid the difficulties associated with combining multiple sources of data in different formats by working directly with powerful image and CAD tools within the Simpleware software environment.

From Image to Mesh

Simpleware software offers a direct route from image data to simulation. Generated meshes are ready to use in the FE/CFD solver of your choice, with extensive options for tailoring your models to different simulation requirements. Rely on software that generates simulation-ready models, with no need for post-processing or fixing. Export directly to all major solver formats.

Expert Model Generation and Services

Our service team can generate models for any application. We will work with you to develop a model, or series of models, that are tailored to your specific needs. This can be based on your own scan data or we can work from our library of high resolution image datasets.

Fully Supported Training at All Levels

Receive step-by-step training and personalized support on all areas of Simpleware software, including one-to-one sessions, web-meetings, and bespoke training courses in-house or on-site. Attend one of our regular workshops or webinars on how to get the most out of the software. Contact us at simpleware-support@synopsys.com if you have any questions about using our solutions.

Expert Support for your Requirements

All licenses come with full support from our team of experts. Our engineers can help you develop your unique workflows, ensuring your use of the software is as efficient as possible, and your final output matches your requirements. Our support is offered via email, phone or web-meetings, or we can even visit you on-site.

Try Simpleware Software

Try the software for yourself with a free evaluation version, available on our website. The trial is fully functional and gives you access to the complete Simpleware software suite, full range of tutorials and technical support.

Simpleware Software Solutions

The Simpleware product group at Synopsys develops an industry-leading 3D image processing platform for the visualization, quantification and conversion of 3D scan data (MRI, CT, micro-CT...) into high quality design, simulation and 3D printing models. Simpleware software is used in the Life Sciences, Clinical Applications, and Materials & Manufacturing. Easy-to-learn and use, the software offers a robust bridge between the latest imaging technologies and multiple design and simulation applications.
